Ahmedabad.

THE NATIONAL BOOK TRUST has planned to publish a series of books on various aspects of India—the Land and People. The object of the books will be to make available to the ordinary educated man, the non-specialist, knowledge about all aspects of this country in a sizable and readable volume.

This is the first effort of its kind which will attempt to cover a wide variety of subjects, including geography, geology, botany, zoology, agriculture, anthropology, history, literature, culture, languages etc. Briefly, it will form a kind of encyclopaedic library of books on India.

The format of the books will be Demy 8'vo ($5\frac{1}{2}'' \times 8''$), of round about 200 pages and fully illustrated with photographs, diagrams, charts etc., wherever necessary. The books are being written by acknowledged authorities on different subjects and will be factual and scientific. The language will be simple and easily understandable by the ordinary educated reader.

The books are being prepared under the guidance of leading experts and scientists in the various fields. We have been able to get the cooperation of most of the leading scientists and specialists to serve on the Board of Honorary Editors of our Series.

BOOKS UNDER PREPARATION
