

...man American delegation, 1933.

THOMAS MANN, Doctor of Letters—Novelist of rare distinction, an interpreter of life to many in the Western World, one of the few contemporary guardians of the great traditions of German culture. (German novelist, author of "Buddenbrooks," "Magic Mountain," "Joseph and His Brothers," &c.)

HENRY AGARD WALLACE, Doctor of Laws—A public servant of deep faith and high integrity, who finds courage to attempt an uncharted journey in our modern wilderness.

ALBERT EINSTEIN, Doctor of Science—Acclaimed by the world as a great revolutionist of theoretical physics. His bold speculations, now become basic doctrine, will be remembered when mankind's present troubles are long forgotten.
