Dear Sir:

Permit me to take this means of expressing my personal views in favour of the noble purpose for which the Second International Conference for the Roerich Pact is to be convened in Bruges. The humanitarian movement for the protection of artistic and cultural achievements of mankind is a worthy cause which commands the whole-hearted support of all people. It will not only in its practical result facilitate the safeguard of the works of art and culture, but also help to inculcate a noble human spirit in the generations to come. I am most sincerely wishing for the success of the Conference.

Yours very truly,
