My dear Sir:

As the time approaches for the Assembling of the Second World Conference of the International Union for the Roerich Pact, I want to grasp the opportunity to send to you an expression of my complete sympathy with the aims and objects of the movement, and the hope and belief that the present Conference will be productive of much that will give added impulse towards the realization of these ideals.

This constructive ideal, so nobly conceived by Professor Roerich and so ably fostered by those associated with him, must eventually be accepted by all nations, for humanity is moving forward and upward, the milestones of its progress are marked by the acceptance and practical application of such broad and universal concepts.

I beg to remain,

Most cordially yours,

Signed: Wilbur F. Holt.
