IT is the perfection of the ideal as ideal  
that matters and not the truth of its  
setting in space and time.

They who could create great ideas must  
themselves have been the ideal that they  
held up for worship.

The word is - Woman and People - Sir V.

A social formation that had become  
fixed was like a tree that had ceased to  
grow. Formed and dead are synonymous

Modern science must be learned but not

at the cost of the ancient spirituality?

The mother's heart in the women of the down-bringing ages must be conjoined with the heroic will.

Plans glow and world turns alone

There is no privilege to be compared with the trust of a great service. It is that the savants who should go on his way living, not the saved.

To bring to a large population the idea that there is a world of thought and knowledge unattained by them is the first step in the popularizing of new culture.

The secret of success in work - to make the end the means, and the means the end. No more than half a dozen people in the whole world are ever at any one time ready for great truth.

There must be room for sects, as seeds are for sowing above sects

Frame laws but frame them on such a fashion that other people are ready to do without them they can burst them asunder.

Our originality lies in combining perfect freedom with perfect authority.

Both is nothing - environment is everything.

Impatience is inconceivable

There is no cause which must not be the path to god. The question of attainment

depends only in the last resort on  
the thirst of the soul

Character is spirituality

greatness - to take the common things  
of life and walk truly amongst them.

Holiness - a great love and much service.

The highest Truth is always the simplest.

By our own effort, or by the mercy of some  
great perfect soul <sup>can</sup> we reach the highest.

Consciousness is a more film between  
two oceans, the subconscious and the  
superconscious —

Invention when genuine can never con-  
tradict Reason.

The boundary line is always splitting  
Western language declare that man is a body and has a soul. Eastern language like  
I am - I have a soul and God also has a body.

Religion itself in the ordinary sense is simply  
philosophy conducted by means of symbols and  
ritual. A well built system of philosophy  
takes no hold on mankind.

For the evolution of spiritual force it is necessary  
to first to evoke intense energy of emotion  
and then to hold this in absolute testament.

Bring your own lotus to blossom, the bees  
will come of themselves.

Believe first in yourself, then in God.

Yesterday competition was the law - to day  
cooperation is the law.

To judge truth by the what good it  
does us is bad as to question the value of

scientific agency to a baby -

The greatest force is elicited from this power of thought. The finer the element the more powerful. The silent power of thought influenced people even at a distance - because mind is one, as well as many. The universe is a ~~one~~ - world, minds all the species -

Man must recover from his slavery to law, to words and so on

Poverty is not a synonym for holiness, often the reverse Renunciation of mind

t.

All have to think in sound and colour in distinction and contrast. our duty is not to disturb the faith

of others.

It is the most unselfish form of happiness in the world

What can satisfy man? One Infinite alone can satisfy him and that Infinite is himself -

The Buddhist accepted the Report of the sage  
It is well to be born is a deadly, but Tis terrible to die there

One proceeds from Truth to Truth and not from error to the Truth

The spirit behind an act is more powerful than the act itself -

Every kind of mastery is a form of renunciation -

Supreme achievement is strength -

What is true, what does not matter, if by lost it is believed in added that  
it is not true, what does not matter? spiritual life which seeks to base  
its message on itself.

Obedience should be combined with self-respect. Patriotism was never practised by plannor  
The greatest fault is to force upon others. The difficulty is not in organization and  
that which we had merely found to be good making plans. — The test, the real test  
for ourselves.

Even as a lion not trembling at voices; even as the wind not caught in a net;  
even as the lotus leaf untouched by the only he alone unconsciously never by trying  
water, to do thou wander alone like the lotus leaf untouched by the water, to do their common sympathies — And this can  
be done —

It is not the form of his life that makes a sadder. Non-assertion of the leader and help him to  
development in his own way.

The first lesson is to destroy the self-sufficiency. We must speak to all men in their  
own language —

He who would be great must suffer  
and how some were fated to see every  
joy of the senses turn to ashes - the  
whole of life is only a man's song.  
The lion when stricken to the heart gives out  
his mightiest roar. When smitten on the  
head the cobra lifts its hood. And the  
majesty of the soul comes forth only when  
a man is wounded to his depth -  
Will is not strengthened by change. It is  
weakened and enslaved by it. But we  
must be always absorbing +

The sign of growth is absorption  
The will of totality nothing can resist  
It is what we know as Love  
Tarnatic clarity is performed on an impulse

The ~~dark~~ Birds of nothing but divine impulse  
to be Kind -

Philistic clarity is what a man does for his  
own glory. And divine clarity is that  
which is given to the right person in the right  
way at the proper time -

Look for greatness in little things -  
They will be great in a great position  
More true greatness is in doing this duty  
silently, steadily, from moment to moment  
and hour to hour

The sun state of things must be a growth  
from within

Strength and fearlessness -  
Every dove may have her Rock or  
Rock and Ring are obverse and reverse  
of a single medal. From the use of the  
last in the renunciation of all others as

but one step,

The intellectual fence is so necessary to the seedling, but so ministerial to the tree, the tree. The very fact that we impose limitations is a proof that we are dealing with the fence. When the eye of experience should be full the soul will dream only ~~fence~~ <sup>the</sup> infinite.

Everywhere you will find some sort of faith and Righteousness. See that you foster them and do not destroy.

God is higher than words; than Yoga, than Knowledge.

What you think you know at Extreme love and highest knowledge are one -

The more our ~~less~~ is within, the more spiritualness are

Imagination is the ~~standard~~ <sup>of</sup> truth

Spiritual strength is religion after all

Our best work is done our greatest influence is exerted when we are without thought of self.

- We are what we think. Large masteries do not care of what you think thoughts have they travel far - It is the desireless who bring results.

As soon as we say "I" we are humbugged all the time and we call it knowledge but it is only young wind out and like a balloon tied to a tree, so he who dedicates himself best accomplishes most conquer yourself and the whole universe is yours

The adamantine wall that shuts us in  
is egocism.

Go there where people hate you, let  
them knock the ego out of you and  
you will get nearer to the Lord.  
The power is with the silent ones,  
who only live and love and then  
withdraw their personality.  
Dare to come to truth even through  
hell.

Perfect strength will have no activity  
in this world, it only is, it does not  
act. <sup>act</sup> Kandha said: You are best, you are  
real, when you are not.

No impatient one can ever succeed.

(end)

To not say - you are bad, say only - you  
are good but be better.

10

If you don't allow one to become a  
~~lion~~ he will become a fox.

Spiritual aspiration ought to be balan-  
ced though intelligent otherwise it may  
degenerate into mere sentimentality  
- We cannot see outside what we  
are not inside -

Every step that has been really gained  
on the world has been gained by loss.  
Criticising can never do any good, it  
has been tried for thousands of years  
condemnation accomplishes nothing  
until you are ready to change any  
minute, you can never see the truth.

Man's Knowledge is only a higher  
degree of brute Knowledge.  
Liberty is nothing more than dis-  
trust ~~on~~ of ignorance  
The full ripeness of reason is conviction  
but intuition cannot antagonize reason,  
The vulture soars high out of sight  
in the sky but his eye is ever on a  
bit of carrion on the Earth.

Without mother-love no creation could  
continue

Love concentrates all the power of the  
world without effort as when  
a man falls in love with a  
woman

Lies keep down perfect sympathy and  
keep back pure research

What is now suggestions for  
us will wages to come be the <sup>11</sup>  
conscious for all.

It is better to die seeking a god  
than as a dog ~~soul~~ seeking  
only carrion.

Choose the highest Ideal  
and give your life to that, death  
being so certain, it is the highest  
thing to give up life for a great  
purpose

Yes, identify yourself with the  
body and all pain will cease  
this is the secret of healing.

Whenever you learn from another man's words, know that you had the enjoyment in a previous life because experience is the only teacher -

The Known Theory, Known nothing -

The happiest moments we ever know are when not entirely forget ourselves -

The whole secret of contentment is to love not fear -

Modern science has really made the foundation of religious stories that the whole universe is in a incessant divine vibration

Where there is no vision - the people perish

Congress and State of the United  
States at the time of the Revolution  
and the American War of Independence,  
and the present condition of the country.  
The Congress of the United States  
is now in session at Washington, D. C.,  
and the members of the House and Senate  
are from various parts of the country.  
The members of the House are from  
various parts of the country.

Through the efforts of many men  
of ability and experience, the  
country has been greatly improved  
in every way, and the people are  
now more numerous and more  
prosperous than ever before.

There is a great deal of  
work to be done, but the progress  
is rapid, and the country is  
now in a much better condition  
than it was ten years ago. The  
people are more intelligent and  
more patriotic, and the government  
is more efficient and more  
responsible. The country is  
now a great power, and its  
influence is felt throughout the world.  
The people are more  
contented and more  
prosperous than ever before,  
and the future looks bright for  
the United States.

I agree with Dr. J. O. Smith on the <sup>46</sup> Geographical aspects of Pugibium. Right  
now there is a great deal of work on the Pugibium <sup>aspects</sup> <sup>and before you do go down, take note</sup> which is probably the best part of the ground. For a number of open country regions  
I always take pictures from time to time. On the side of the

take I Johnson. Recently, in the Pugibium <sup>abundant throughout the area</sup> <sup>but</sup>  
encountered Pugibium vegetation here and there. The cycle of life seems  
to take place at the south, the north, and the center, with the center  
being the main, the Th, the center, <sup>further north again. This may be</sup> <sup>the</sup>  
Johnson's own view point. P. Johnson  
says he has seen Pugibium <sup>first seen in</sup> <sup>P. Johnson, by</sup>  
in the mountains of California. P. B. Johnson  
and Johnson's opinion <sup>below</sup> <sup>is</sup> <sup>that</sup> <sup>the</sup> <sup>the</sup>

brownings gone now & senescent  
leaves mostly brown & have lost many  
of young leaves after frost. The leaves  
are still green on the lower branches, but the  
upper ones have turned brown. This is due to  
the fact that the upper branches have  
been exposed to the sun more than the lower  
ones. The lower branches are still green  
and show no signs of senescence. This is  
due to the fact that the lower branches

After a long cold winter with very little  
rain, the trees are now turning green again.  
The first signs of life appear in the buds  
on the twigs. The buds are small and  
green at first, then they turn yellow  
and finally they open to reveal new  
leaves. The new leaves are small and  
yellowish-green at first, then they  
turn green and finally they turn  
brown. This is due to the fact that  
the new leaves are still young and  
have not yet developed their full  
color. The old leaves, which have  
already turned brown, are still green  
but they are smaller and less  
colorful than the new ones. This  
is due to the fact that the old leaves  
have already lost some of their  
pigments and are therefore  
less colorful than the new ones.

A good all round soap though it is not to be put  
near the soapstone. A soap must be carefully  
selected & kept in - strong & durable very  
soaps take away the fat from the skin. Potash  
is by far the best & strongest soap & can stand much  
in cold weather. They are also good soaps. Af-  
ter a bath, potash soap is the best - After you  
are in the bath - wash yourself, then the soap &  
then lather up with a good soap. Then when  
you have washed yourself in the soap  
& foam it off, & then when you have  
had a bath, then wash yourself again.  
Then wash your hands & feet in the soap  
for about one hour & then dry them, then the bath,  
then the soap - is on the hands -  
For the soap & gelato soap are made from green  
pepper & cayenne pepper. No, 2 pieces after a bath

D. W. is a bird after our own hearts - we have been  
given every pleasure & accommodation possible.  
K. Gopinatharao, who is busy, and very popular  
Prof. Gopinath Rayudu, Rector of the Andhra University  
and his brother, however, have no time for us  
either. Tellicherry, again, like the enormous K. Ray,  
was broken down. So I am writing to you  
out of luck. Dr. Roy Choudhury, another, seems  
about half a century old & is now quite generally  
known among business men throughout, you will see  
why he would be willing to meet. The Pugwash  
Meeting here, Prof. B. T. Venkateswaran, Sankaran Jayaram  
Sankaran Jayaram, and others, are all  
as known / as we may get them. I will  
try to find out what they are, and tell you more.  
For the time being, we have to rely on Prof. Roy Choudhury  
and his brother, and others who are good, Dr. Roy, Weechip-  
uram & K. Rayudu. Two of the latter, Prof. S. Balaji  
and Prof. B. Venkateswaran, are of great importance &

more than enough water  
and the sun, we can get  
water from the mountains, because  
there is more water there.

Progress works  
but problems are too much other  
ways. The economy must be  
progressive and stable. We must  
not let go of our culture; it is the basis of  
the community and the way of life.  
We must not forget the past, but  
we must move forward. In order to do this  
we must have a good education,  
but also a good job. We must work hard  
and be honest. We must be kind to others  
and respect their rights. We must be  
responsible and accountable.

5

If we take care of the environment  
in the future - the environment  
is open to us, we have opportunities  
to live well and to live in peace.  
We must work hard and  
make progress, but we must  
also respect the environment.  
We must be kind to others  
and respect their rights.  
We must be responsible and  
accountable for our actions.  
We must be honest and  
trustworthy. We must be  
responsible and accountable.

Kane Dameron yesterday, Park in  
our city park, which is a  
good place to go jogging and  
walking. It has a lot of trees  
and a lot of green space.  
It's a great place to exercise.  
I hope you will come and visit  
us soon.

Küßt den? der du unten zwischen den Bahnen wälst.

Nach liegt in sie verschlaff' vor Ruhe

Die Welt des Slaven Volks! Wenn sie erwacht,

Dann alterndes Europa — gute Nacht!

De Lädelst? Lächle nur. Deine Rasse zerfliegt  
wie Spira noch vor dem Klaue des grossen  
Slaven Volks!

Meinst du nur Europa sei im Zukunfts  
der Kultur?

Wie alt und wie gebrechlich seid Ihr!  
Von lauter Bildung und gesittung schwäch  
lich Ihr seid verwertet seid müßig und  
morsch geworden! —

Premieren? Man kann ungern Raum-  
suchen. Diese ist es nun nicht  
mehr als ein' Klop' Cheloniidae. Loya-  
fe sogenannt von manchen sprangen  
zunächst Elfona!

Was ist man? Was ist er? Ke-  
nobend bewirkt ausdruckslos rasche  
Folgen ohne Geduld, das spricht man  
man manchmal was Elfona vorher zu  
gut! Sogar wenn ich sage? Das hat  
man in Gedanken! Das sagt man in  
jedermann's Kopf und kann es  
da etwas bedeuten, da zweimal in fol-  
geradem —

Nach - Tagestages —

Hast du? — da drunter rauscht der  
Böhmerwald!

Nach liegt in still verschlafft vor Ruhe  
Die Welt des Sklavenvolks! Wenn sie  
erwacht,

Nach,  
Dann alterndes Europa — gute ~~Zeit~~  
— Der lädelst? Löible nur. Deine  
Rasse zerfliegt wie Spren nach  
vor dem Herre des großen Sklaven  
volks! Deinst du nur Europa sei die  
Zukunft der Rechte? Wie alt sind ihr  
Wie alt und wie gebrochen! Von Lauter  
Bildung und Güte nur schwächer  
Sie sind verwest seit mirb und  
morsch geworden! —
