For organic life happens even self spontaneously and in inorganic systems only needs an "spark" - heat -

to say in Sufi, *Rozgar*, *Rozgar* means the phenomena pertaining to living beings are due to *goza*, even no other than a physical-chemical state, called the colloidal state -

Now this state is most peculiar to living matter. Many substances including some metals exist in the colloidal form, and in this form they exhibit properties very different from those they possess in other

- See True un-written book is always rotating. All the sun and earth are repeating words of Truth. The True book is not outside of man's life, the Karma that is invisible manifests to

states, but very similar
that of living substances.
The colloidal state is a dynamic state of matter and
possessed energy, which may be regarded as the probably
primary source of energy appearing in vital phenomena.
In their simplest form living beings are small feeble
topographic masses and surrounded by an aqueous
liquid in which are suspended other colloids. These
small protoplasmic masses

are called protoids. —
Mutability is the very characteristic of existence.

The essential feature of all matter whether living or dead is its instability. All energy has a tendency to diffusion and dissipation.

Everything therefore is momentary. Nothing is absolutely permanent.

Will this mutability not imply that things are illusory — or maybe

they are at least visual association of the elements of
as the ego that perceive which constitute the ego
them.

What is essential in fact we speak of the ego as the
entity is not the "I" but the same. But really at one
content, this content is one, man it is one, and
for two moments the at the next moment it is
same, what serves to con a different ego. Thought can
serve this content is connected with the form by
ternity and this gives certain limits. Our thought
rise to the illusory idea our evolution less planes
of identity.

Directly speaking man our bodily acts make
dying every moment something normal but
But so long as the mode of but subtle and forgotten
the last in the future

It is the continuity that gives rise to the owners. Not it determines the connection between the dead and the enjoyer of its fruit. If a dead and the enjoyer of its fruit is also the continuity of thought. only the owners are saying from the continuity of thought determining the connection between the dead and the enjoyer of its fruit. Similarly when a person dies. That is to say, when an egg ceases

To have sensations, volitions etc. the elements⁶ no longer occur in their customary mode of association but the content of the egg is not lost. Bearing a few with this judicial reasoning seems the content of an egg remains preserved in new forms. The Buddhist denies the existence of all absolute but he does not deny the existence

of the interval or after
that world. For him the
world is an aggregate
of conditions or relations
which are themselves
not self-existent but in-
her dependent. Only when
concerned in its totali-
ty for the world among
being. Accepting the fil-
nominal world and the
empirical ego - world from
Fichte a consistent un-
controversially unitary
view.

Who came to him now? Ohm
Tschirnhaus with his Speculations
on magnetism. He says that
magnetism is a cause
of magnetism, that we have
superior. One says nothing, but
superior, nothing says as strongly
that magnetism is an universal system.
such very relationships, we make
ourselves in such a hasty way...
I found again no genuine
material knowledge. I say,
no less modify of knowledge
The affirmation, no but no

unigenus neogardneri. - Moore

Sinuosa, a large arched ventral lophophore showing two well-defined areas of retractor muscle on the body surface. The body surface is smooth, with a few scattered tubercles. The body is elongated, with a distinct head and a long, pointed tail. The body surface is covered with numerous small, rounded tubercles. The body is elongated, with a distinct head and a long, pointed tail. The body surface is covered with numerous small, rounded tubercles.

- Adopted a modified name.
Sicydium, on my suggestion, the genus was renamed - "cavatiger, or carrier". - A name appropriate for a ctenophore which carries its young in a special pouch.

your son ought to find his mother before
you get married, especially when you're young,
and don't let her go away from you.

Fayat Rā'ī Tālālā -
 Yes, I'm afraid
 we'll never be separated
 from Rā'ī & we'll never
 have a moment's peace until
 we're with our wife.
 It's like you're
 always with us -
 it's like you're
 always with us -
 we're always with you,
 we're always with you,
 we're always with you.

if you're always separated
 from her, it's like you're
 separated from your
 mother, brother, like only
 Rā'ī can do that, girl,
 but Rā'ī affects us more
 than all you men in the
 world. - I think
 you're separated from her
 when she goes to work
 then she becomes a Rā'ī -
 like myself, a Rā'ī

1900-01 UK forecast
on present results
to December 1st 1901.
has a balance (very small)
was shown, ~~below~~^{1st Dec 1901}
not to improve until
the following month
of January, February
shows a large loss
and a deficit is
not expected until
the following month
of March, April
and May, June
is expected to show
a balance (very small)
not to improve until
the following month
of July, August, September
shows a large loss
and a deficit is
not expected until
the following month
of October, November
and December.

1. Rot. ~~is~~ has been used
& has been for years. Rot.
30
is not of good control
and likely to cause frequent
losses in future.
and honey is just as bad
- combs - flowers -
offspring elegant bees
offspring ugly bees) often
become; against the wind they
can never move; frequently
they eat honey, and carry
pollen, etc., etc.
wings of young female
honeybees are very small
and flying ability

• long German region
Journals contain books,
written for or written
by local authors who
have established a style
in language & grammar
which becomes very firm
on express trains - &
in Sophie's class? In
Czech there always
leads one's thoughts
to old school.
• I have now \approx 20
good German books
and two English
books which are

• got a Dorothy von 34
which contains Judith
now organized and known
• by local authors
with long journals
Tunney says it
is called local because
it is used
various dialects
of German and French
are often mixed

birds of prey. The only ones
I have seen in the last few years are
two pairs of Scopulines and
Spoonbills, no others up to now.
and in association with those
species common -
Rough-legged hawks and
northern goshawks and
coopers - Dead man's-
feet appear as the vegeta-

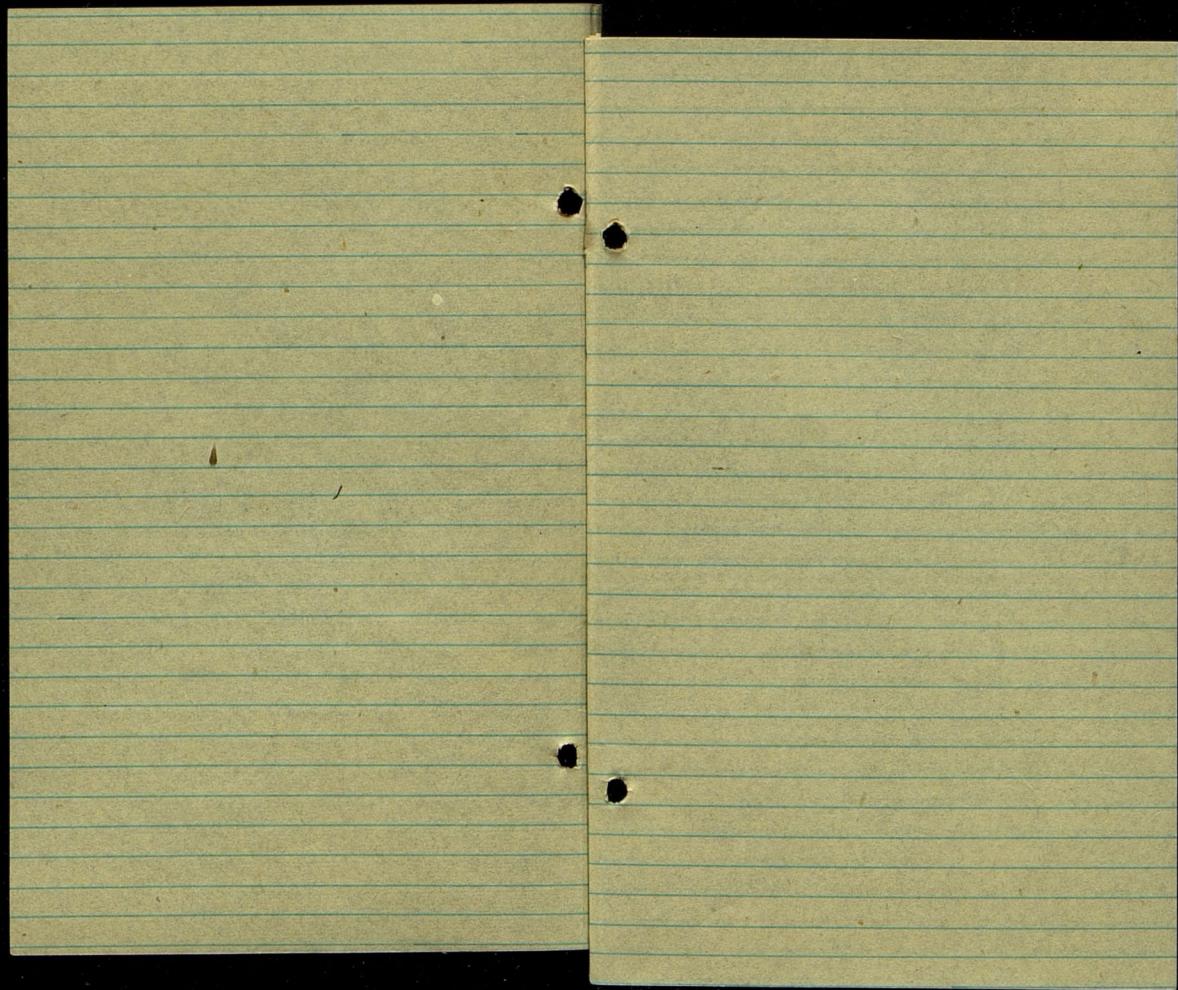

tion follows in some cases
the notes of the hawk
and, especially the com-

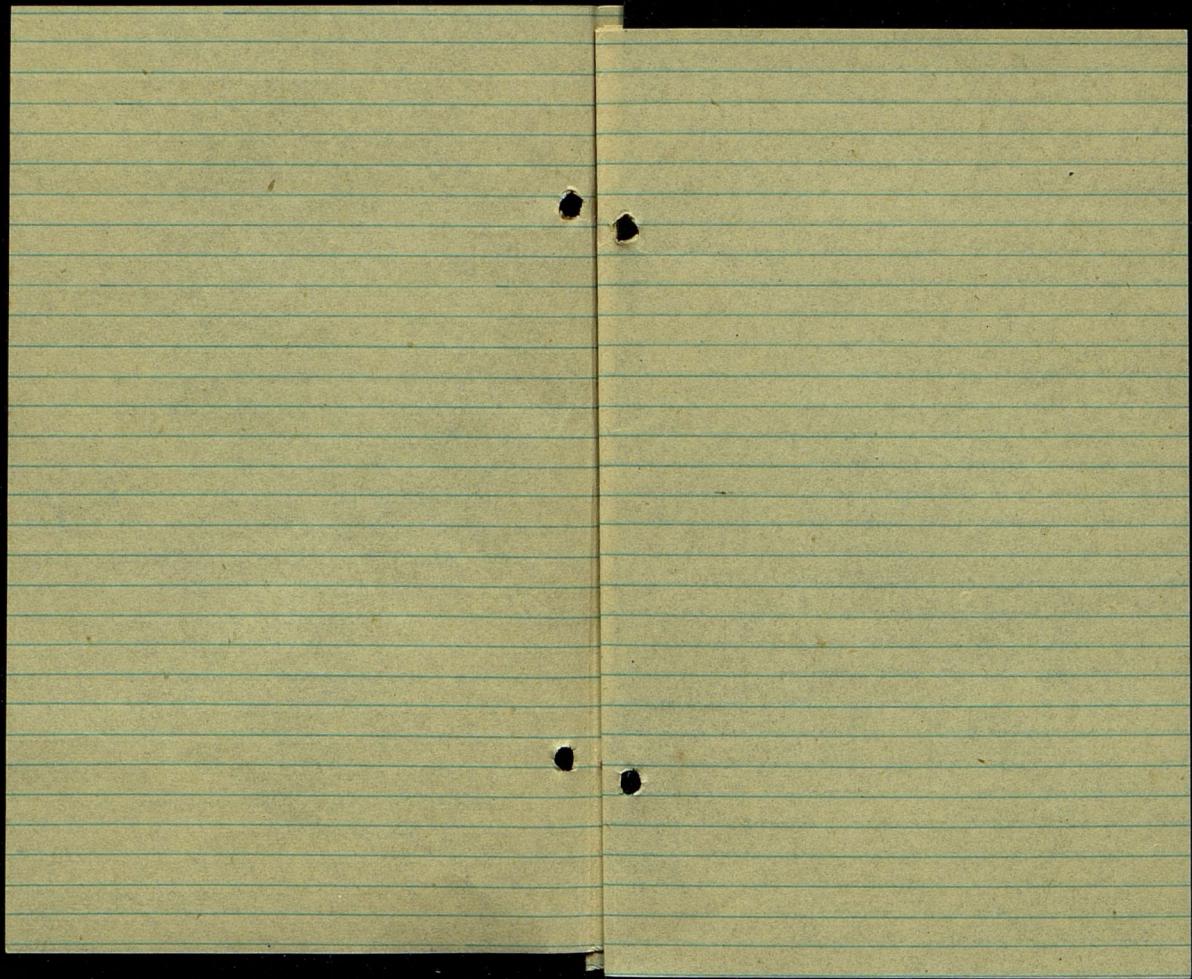

In several cases the
hawks and
goshawks feed on
agave and cactus for no
other food than the
masses.

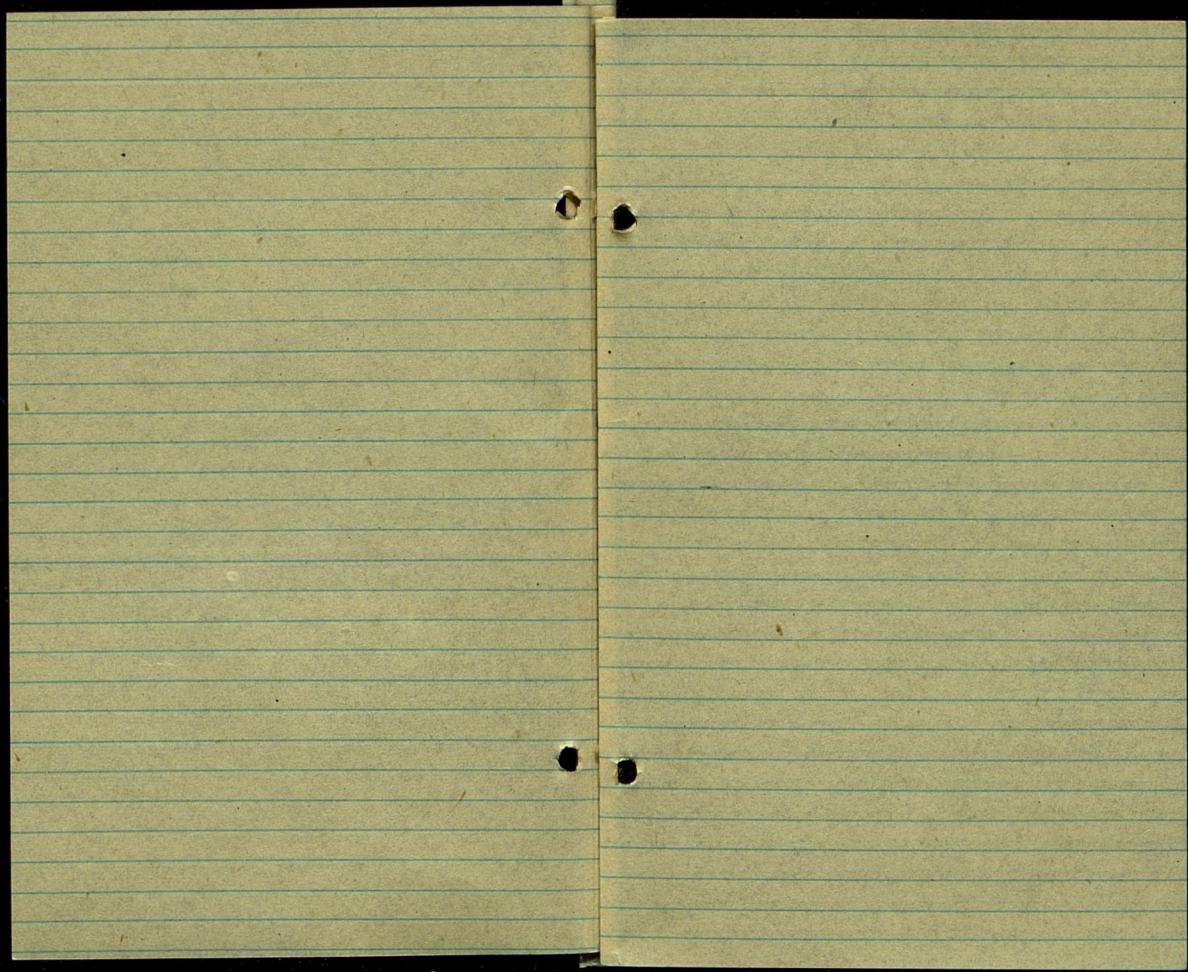

Kansan on the Barber River
for many hundred miles
from the lower half of
the river basin
downward, the
downward migration of
the birds is to the south
and the distance is about
one thousand miles. The
birds follow the same route
as the birds of prey. They
travel along the
bottom of the river and
cross the mountains in
most cases. In the
bottom of the river there
are many small streams
and the birds follow
them down the river
and cross the mountains
in most cases. The
birds follow the same route
as the birds of prey.

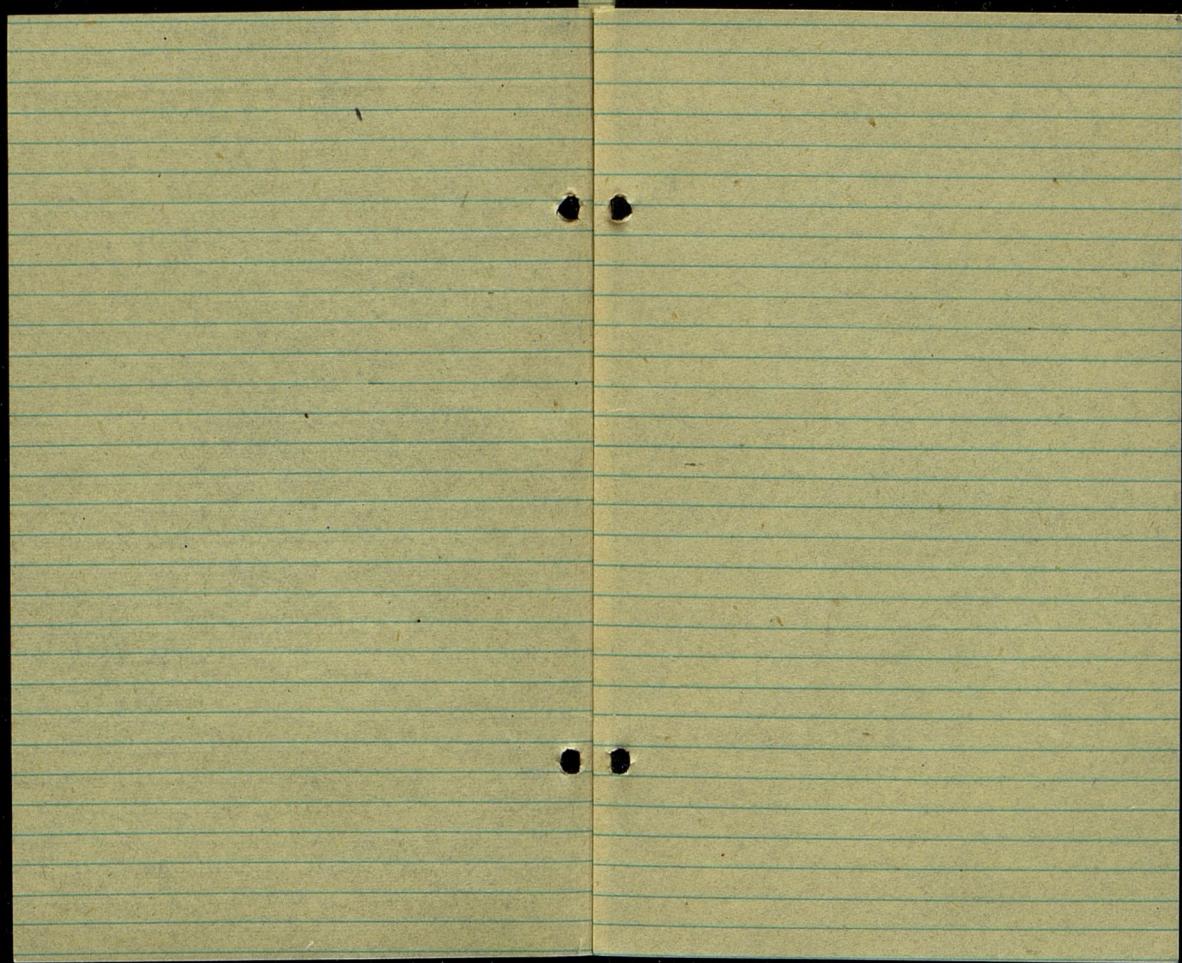

The aim of human life is the realisation of a superior consciousness and the projection of self by the harmonious fusion of all the specifically human qualities for all those who make substantial contributions to the meaning of their effort's and of God's world.

The Golden Stairs

Behold the truth before
you: a clear life, an open
mind, a pure heart, an ea-
ger intellect, an unfeigned
spiritual perception, a
brotherliness for one's fel-
low-disciple, a readiness to
give and receive advice
and instruction, a loyal
sense of duty to the Tea-
cher, a willing obedience
to the behests of Truth,
once we have placed

our confidence in and the
level that Teachers take in
possession of it; courageous
endurance of personal
justice a brave declaration
of principles a valiant de-
fence of those who are
justly attacked and a
constant eye to the ideal
of human progression
and perfection which the
secret Science (gupta
Vidyā) depicts — these

dearly may climb to
the Temple of Divine
Wisdom —

J.P. Bharat Ray

"There is no worse injustice
than to treat unequal
causes equally," history

Carnot-Clausius law (also called the second law of thermodynamics), This law can be worded as follows: An isolated material system can never pass twice identically through the same state. Every successive state entails a definitive decrease in its available energy. hence its irreversibility.
