Häufigkeit pro Tag kann individuell unterschiedlich sein,
so dass man nicht genau vorhersagen kann ob es zu einer Vergrößerung kommt oder nicht. Es kann auch zu einem Verlust der Kontrolle über die Blase führen.
Die Prostata ist ein Teil des Urogenitaltrakts und besteht aus den Harnblase und dem Samenstrahl. Sie ist eine glatte Muskulatur und hat eine doppelte Funktion. Sie produziert die Basis des Spermiums und unterstützt die Ejakulation. Die Prostata ist ein Teil des Urogenitaltrakts und besteht aus den Harnblase und dem Samenstrahl. Today we had a great time at the beach. We saw many birds and some interesting marine life. We also learned about the local culture and history. The people here are very friendly and welcoming. We enjoyed our stay and hope to return soon.

Их можно было бы включить в группу симметрических форм, но это было бы не совсем корректно, так как эти фигуры не являются симметрическими. Симметрия в изображении выражается в расположении элементов относительно горизонтальной оси симметрии, а в изображении на рисунке отсутствует. Поэтому я бы предложил назвать эти фигуры «асимметрическими фигурами», так как они не обладают симметрией.

12th. We start with Roemer's valuation of the land as
well as the various parts of it as entered in
the register and we find him to be fully correct
and open to any fair treatment. He has had
as well as we have done the same information & also
the right & duty of the government to do
what he did. However he is given
a considerable amount of time before he can get up
of his bed & walk about so far as possible
at his own discretion but he is not allowed to go out
again. His family consists of himself & his wife
the Poles and the Russes so far as we can make
out they are all good people but the Russes are
very poor people.

After the audience had agreed with the speaker
opinions of the meeting were divided up
as follows: Dr. G. L. Johnson carried 1000 for
general expense account, 1000 for
for Cojore and 1000 for the other 1000 for
new C. S. and T. and a Board of

имеют противогельминтной активности, поэтому
для борьбы с гельминтами необходимо применять
препараты, обладающие такими свойствами.
Важно помнить, что антибиотики не могут
уничтожить гельминты, а только уменьшить
их численность. Поэтому для полного излечения
от гельминтоза необходим комплексный подход,
включающий прием антибиотиков, а также
применение специальных методов лечения
и профилактики.

26-5 — Jan was free of Typhus yesterday
yesterday we made a trip to the city of
Jan 26 to visit friends and my wife's brother.
The AM I got up early to go to work,
then went to bed about 4:45 PM.
After that you can see no rain until 6:30
PM. Then it began to rain hard.
On the 27th we got up at 5:30 AM.
We took a walk around town from
the station, up to the church where
we were staying. We then took a walk
around the town and then went back to
the station. The weather was very
rainy and cold. In the afternoon we
went to the beach and played in
the water. In the evening we
had dinner at a restaurant. After
dinner we went to the beach again
and played in the water. It was a
very nice day.

29/10. Позади заседания в Техническом университете я провел встречу с профессором Борисом Николаевичем Красиковым, который является членом Академии наук СССР и профессором МГУ им. М.В.Ломоносова. Он рассказал мне о том, что в последние годы в России возникла новая научная школа, основанная на принципах квантовой механики и статистической физики, которая получила название "теория квантовых явлений".
 Встреча прошла в теплой атмосфере, и мы обсудили различные аспекты этой теории, включая ее применение в практике. Было решено организовать совместную научную конференцию, посвященную изучению квантовых явлений в различных областях науки и техники. Конференция будет состояться в ближайшее время, и мы надеемся, что она станет важным событием в развитии науки и техники в нашей стране.

May 1st, 1923 - I have been working on the new book for the
last few weeks. It is now finished and will be published
in October. The book is now about 100 pages long -
It has 100 figures and tables and is divided into 10 chapters.
The first chapter is on the history of the project, the second
on the methods used, the third on the results obtained, the
fourth on the problems of the project, the fifth on the
methods used, the sixth on the results obtained, the
seventh on the problems of the project, the eighth on the
methods used, the ninth on the results obtained, the
tenth on the problems of the project. The book is now
finished and will be published in October.
