

June

1. Let us contemplate upon the rain bow - pay attention that in it there is no dense blood-red color, no black; amidst the highest emanations we shall find only the radiance and subtlety of color. Upon the earthly surface penetrate certain colors which remind of the higher spheres. Some people love these reverberations of the Highest World, but the others, on the contrary, prefer the most dense colors and according to such a ^{difference} differentiation ^{distinction} we can justly divide the people. If some one did not as yet prefer the subtle quality of the color, he shall not be, all together, in a position to understand the higher worlds. Often such people are being destroyed, because their re-modeling is almost impossible, and many medicines shall also not be of use to them.

2. A physician notices, that certain medicines act differently absolutely upon people. A certain excellent, life-giving remedy will be only a sexual stimulus for definite people. One can test people ~~off~~ with medicines. The

lower nature draws out of the substances only the lowest. But every force in communion with the highest will draw, precisely, the highest. Such a law is necessary to remember. Even a physician rarely interprets correctly the various results of medicines. Yet there is in everything correspondence.

3. Physicians can be true assistants of mankind in the ascension of the spirit. The reasoning of the physician must be enforced by the heart. It is impossible, when a physician becomes an ignorant denier. A physician must be but a psychologist and cannot neglect the wondrous psychic energy. It is not strange, that a physician is being mentioned in the beginning of the writings of Aurore. It is necessary to mention all who are responsible for the link with higher energies.

4. If earthly substances act so differently upon people, ~~then~~ how much differently there will be upon them the reaction of higher energies! People have understood long since, that for the correct receiving of these rays it is necessary to bring the organism into a harmonious condition. The sages have

given for that the power of sacred invocations. Annex or in sound Om was such a synthesis of ^{aspirations and spiritual} ~~resonant~~ ^{in sounds} ~~strivings~~. A prayer, a wise action are those excellent achievements, which render healthy the condition of the spirit. Every one in his way brought in an helping manifestation into the concentration of the spirit; some recited a decision in music, some in singing, some in dances; there were even coarse ways of bringing oneself to a state of drunkenness and rapture. There are many deviations and delusions, but in its foundation the human being has striven towards the creation of a special exalted condition, (attunement) which would assist towards the acceptance of higher energies.

§ 5. A human being cannot live through a life without even once having felt the warmth of the heart. Of course this shall be a fiery feeling, but when it will be surrounded by radiant diadem and rainbow, it will be already linked with higher energies. People must not speak and complain that nothing is within their reach, on the contrary,

already in earthly life they can experience great energies. An earthly body cannot always feel such manifestations, it will burn away. But an higher condition of the spirit can still experience the rays of ^{bliss} ^(grace) ~~benefaction~~. Let people not complain, but live more purely.

6. When you shall ponder deeply, then you shall perceive Our path. We are ready to help every where, where the law permits. We grieve, when we see, that before reaching the safety line, madmen throw themselves into an abyss. How many thoughts are being spent, in order to lead toward the simplest and best result. But often darkness envelops madmen, and they dare to assault the Highest. The similar takes place, when into an ocean wave one throws a stone. It is true, it will make a few splashes, but will it influence the mighty current? The same happens with all the assaults against great energies. The most ferocious attack is shattered against the rock of the unconquerable spirit. The boasting of dark forces only points out their madness. The mighty Arm will cover the

most mad and fierce attack.

7. Much is being created at present. In vain does some one think, that something does not exist, when it is already here. Thus it is with entire nations - some walk as the dead, the other as if new born. Thus it is in every thing.

8. You know perfectly well the bearing of lightning & suddenness of thoughts, sent from Above. The forgetfulness of such thoughts proves how ~~much~~ ^{different} another ^{an} energy intrudes itself into the usual accord of consciousness. Such forgetfulness depends not from the quality of consciousness, but from an absolutely different condition of strong energies. It is necessary to remember how difficult it is to retain in the memory such windings. Exertions to remember do not help ^{and} if it is ~~not~~ ^{not} remembered, then it is as if suddenly, otherwise speaking, at the touching of a similar energy.

Ancient wisdom has taught, that for the retaining of such windings it is necessary to press down the third eye. This advice was very wise, because the center of

of the third eye in such way can retain the ray of the thought; simply pressing down with the finger the forehead between the eyes.

So also you know perfectly well, that the condition of higher samadhi is dangerous for the earthly body. The power of higher forces is unendurable for fragile bodies, but one has to overcome the condition of usual disorder and then the touching of the highest wings shall not be so dangerous. Again let us remember all sort of means in order to bring oneself into an exalted condition, through these people tried to defend themselves from the danger of the Highest Forces. But the best means shall be a constant contemplation of the Highest Forces. This way the psychic energy will become accustomed to the possibility of reaction from the Highest Forces, and the nerve-substance is enforced accordingly, in order not to be jolted. Because even the best friend can cause a shock, if he shall suddenly enter.
