Occult Science teaches that there is a perpetual exchange taking place, in spite of molecules, or rather of atoms, correlating and thus changing their combining equivalents on every planet.

Each atom has seven planes of existence or being and each planet is governed by its specific laws of evolution and absorption.

The one eternal law unfolds everything in the manifested nature on a sevenfold principle.

Neither water, air, nor earth existed in their present form- for all these and even fire are productions already permeated by the atmosphere of completely formed globes, so that in the first periods of the earth's formation they were something quite sui generis.
