March 15th 1935.

To  
The Eighth Pan-American Conference  
Washington.  
U.S.A.

Gentlemen:-

For the solemn occasion of the ratification of the Roerich Pact on April 15th 1935, the Board and Members of Urusvati Himalayan Research Institute send their Greetings and Good Wishes!

We rejoice for all those who have the protection of true cultural treasures at heart, since it is only by protecting these for posterity that a permanent upliftment of human consciousness can be effected. When all men will realize that the highest standards of life must be cherished as the most sacred and paramountly important values of the manifestation of human Spirit - the Dawn of a New Era will begin for humanity.

"With the material of the past we build the steps of the future" - and it is along these steps that the onward march of the human spirit takes place. Is it not then the most sacred duty of everyone to see that not one fraction of this precious material be wasted in passing strife? It is therefore that we hail the day of April 15th as a new milestone in the progress of human evolution!

Please accept our sincere congratulations and thanks on behalf of Science.

Cordially yours,

President-Founder.
