My dear Mrs Nyell,

It is such a long time since I had news from you. But now I shall hear about you from my dear American friends, who are coming to Bombay on the very end of October, and I will probably stay at Taj Mahal. They are - Mrs Katherine Campbell, Miss Ingeborg Fritsch and Miss Martha Steward.

I have directed them to you as they wish to consult Dr. Cooper, the famous surgeon. I have never met Dr. Cooper personally, but I have heard much about him, besides, I remember how highly you, Dearest, have always spoken of him.

Thus I would be very grateful to you if a consultation with him could be arranged without delay.

Miss J. Fritsch had a bad motor accident some years ago and may be her present pains in the back and arms are the effects of that shock.

Miss Fritschi had some Light and sound waves treatment in Lousange and now is stronger but still her periods from time to time are returning.

I have full faith in Dr Cooper's judgement. He will find how to keep her out of this semi-invalid condition.

Please, Dearest, give full attention to my dear friends they will be in need of your assistance, help. You will like them they are such lovely personalities.

I expect them to come to Ralimong as soon as Miss Fritschi is able to make the trips to our hills, since the last earthquake and land-slides the roads and bridges are still under repair and her back may suffer badly going through such a jolting road.

Please write me, give me news of your family, your boys and grand children - all three more than two?

Best regards to you husband
much love to yourself

affectionately
Helen Cooper
