Conn.

Dear Madame Roerich.

I wish to thank you for the lovely letter which you wrote me. I am going to the wooster school, which is just about twelve miles from our home. I believe that I will really enjoy it. From there I expect to go to a engineering school, but have not really decided on which one. We have not had

any unusual weather disturbance lately but I expect one soon. We have had ample rain lately and all our maple trees are just starting to turn red.

The Kut seeds which you sent us two years ago are growing fine and next year we hope to get seeds from them. Just about thirty of them are living now. The little coin which I recieved is thought of every night.

Love from
Spences.
