Dear Madame Rouché

Thank you so very much for  
the pot of lovely *Mesembryanthemum*  
(called also, Ice-Plant or by you, Gibraltar  
Daisy.) It is a beautiful plant  
especially for a rock garden & I am  
so very glad to have it. I have  
been much occupied with a sick  
cat, who died last night, & have  
not done much in the garden the  
last day or two but very soon I  
shall choose a sunny spot for  
these pretty things & shall slip the  
whole lot out of their pot into the

ground & then I shall return  
the pot in which you so kindly  
sent these. I have tried unsuccess-  
fully at various times to grow  
this from seeds, so I am specially  
glad to have these flourishing  
little plants.

With greetings to you all &  
again - very many thanks,

Yours sincerely

Barbara B. Bullock
