NAGGAR, Kulu, Punjab, Br. India

Feb. 2, 1934.

Dear Miss Palmer,

It is with deep regret that we learned through Mrs Lichtmann the sad news of the passing away of your sister Miss Theodora Palmer. Permit me to express on behalf of the Institute's Staff our sincere condolences in your sad bereavement. Miss Theodora Palmer has been one of the first to interest herself in the scientific research work of this Institute and her and your contribution made it possible for the Institute to carry out field work on a more extensive scale during the expedition of 1931. The Institute has lost a loyal friend and we shall always remember her enlightened furthering of scientific work for the benefit of humanity.

Prof. and Mme de Roerich join me in expressing our sorrow and in sending heartfelt sympathy.

Yours very sincerely,

Director.
