Doctor Georges de Roerich,

Dear Sir,

I am sorry not having acknowledged the receipt of the beautiful volume of the *Urusvati Journal* dedicated to my brother. It probably came during my absence.

It is a great honor for my brother having this book dedicated to him.

He has just started on a new journey to the interior of Asia and will be en route for another eight months.

His big Expedition, which has lasted $6\frac{1}{2}$ years is now ended and all the members have returned to civilisation.

The Expedition he has just ~~just~~ started is more practical than scientific. Its aim is to try and find out possibilities to build roads for motor-traffic from east to west in China and to irrigate the Tarim river.

With best regards

Yours truly

Alfred Hedin
