Dearest Yrie,

Altho' you haven't heard from me in a long while doesn't mean that you have been absent from my mind. I often think of you and try to visualize your life in Naggar. Each corner and place is so dear to me and calls forth the most cherished memories. It is easy for me to imagine the tension of work there with all the plans and works - also I enjoy thinking of the harmony and joy of the creative activity there.

All your letters and news about the development of Unusvate I follow with greatest interest. It is incredible how it has grown in this short time, and the possibilities ahead are incalculable. Mr Stokes who has been very sympathetic to us this winter is coming with his wife to spend a week-end here with us in Morish. We shall try to kindle still stronger his enthusiasm for the research work, also to participate in the Campaign for the further development

of Unusvati.

Katherine speaks so warmly of you and shares in ^{the joy of} all the development of the work there. She cherishes the hope of visiting Naggar some day.

I am wondering how you like Kyelang and the trip - its impression is unforgettable for me.

If young Slavins continues to develop you will soon have an assistant. At present he shows all signs of being a chatter-box and is most amusing. I wonder if he too would gaze adoringly at your beard?

Give my heartiest greetings to all dear ones in Kulu, remember me to the girls and to the doctor

With fondest thoughts,

I am,

As ever

Por.

My dear Yvonne,

Your letter brought me more joy than you can imagine and I loved the photo of you on horse-back which you enclosed. It was such a joy to hear that you and Father liked Bahoul so much, this place carries such wonderful memories for me. I was sorry to hear that you had a rainy season this year - it must have been harder for Mother and she couldn't get the full benefits of the stay there.

There must have been some rejoicing upon seeing our dear Lemo again, what a happy reunion. Hear Esther will tell me about it. It must have been difficult to part with Oj. after her long stay there.

Well, dear brother, I have much to congratulate you for. Your book is a tremendous success and is handsome indeed. Many many thanks for your thoughtfulness in giving us a copy - we appreciate

it very much. We were all thrilled at the splendid criticism in the Times and have heard so many lovely remarks about that review. You have probably been informed that Mrs Oliver Harriman came to our booth at the Woman's Art Exposition at the Astor and showed real interest in your book and ordered a copy. I am sure it is going to have a great success.

Secondly, I wish to congratulate you on the Underneath Bulletin, it has received such favorable comment. Mr Hill of Chicago wrote us a special letter of congratulations and praise for this edition.

No doubt Louis has written to you about Dr Stetten - he seems very interested in our work and wishes to help. He has read your book on Tibetan Art with great care and interest and also mentioned your new book. He says there is dreadful jealousy in the medical profession and one has to be so careful not to create more an-

tagonism than necessary.

The meeting for the Bio-chemical Committee has been delayed because of some technicalities which Mr Stokes requested. The cable received this morning permitting us to grant the Committee members ~~with~~ some membership in the Museum answers Mr Stokes concern, so now we can proceed. Mr + Mrs Sellon have agreed to serve on this Comm. and I believe they can be useful. Katherine will also be on this Comm. Mr + Mrs Stokes met Katherine in Norwich and are very fond of her.

We were all so interested to read your remarks about cures for cancer and other diseases found in Tibetan manuscript. This will appeal very much to people in general. What splendid possibilities are ahead in this branch of activity!

The depression which prevails is appalling. How sad for people who have no vision or spiritual outlook. We strongly feel how

necessary and timely is the message of our beloved Leader and how powerfully it resounds amidst the crumbling structures. People are searching for a new direction and hope. It is wonderful to witness how everything which was foretold is coming to pass.

I think the work of Unswati is developing remarkably and its recognition spreading with astonishing rapidity and success.

With fondest love to you and all our dear ones in Naggar, I am

Devotedly
