Sir Jagadis Bose,
Bose Institute
Upper Circular Road
Calcutta.

Dear Sir Jagadis,

On the 22nd of May, on the steamer "Genova", I am sailing for America, where my lecture tour developed into a nation-wide tour and I shall again have the beautiful possibility to speak about peaceful cultural construction. It shall be a real pleasure to me to mention your great name as a world-wide bearer of the torch of knowledge. You must feel how many real friends you have in America.

I am sure you will be glad to hear that some more great names of world importance joined our group: Prof. Millikan (the discoverer of the Cosmic Ray), Prof. Einstein, Prof. Michelson, Dr. Swift (Rockefeller Institute), Prof. Klemin, Prof. Bacot and some others of equal universal standing.

I am sorry that the health of Mrs Roerich does not permit her to go with us. Miss E. Lichtman, one of our Directors of the Master Institute of United Arts, shall stay with her at Naggar. Please convey my best greetings to Lady Bose, to Prof. Molisch, Miss Ornshalt and all friends.

Yours very sincerely
