My Dearest,
finally your letter has arrived and it certainly was a pleasure to see your familiar although rare of late, handwriting. The Magazines and Newspapers, also as a great joy. You dont know how popular they are with every body.
I came back safely from my trip to the mountains and feel very well except for a very bad sunburn that has well nigh scorched my legs and arms. Face does not count as it was somewhat tough before hand.
My painting is coming along very well.
In accordance with your wishes expressed in your last letter (May 2) I am sending you under separate cover a sketch. Reframe it yourself dont give it to framers. You may have to cut off the edges carefully.

The drought here is very alarming and there are many stomach diseases to be found of late. —— I am sorry not to be able to send you some of my pictures I think you would enjoy them. Well some day you shall see them.
I am very interested to see the kind of work in the U.S. which way will they turn.
Any how we are living in a most interesting time and it is for us to learn all we can from it. ——
As to the condition of town. —
Well, the greatest fight is necessary a grim relentless battle. I know we shall win but we must fight and fight without ever giveing up our arms. The Enemies will retract but not before they find their personal safety in danger

She should be exposed and it may
become the "cause célèbre"
of the present day.
We shall only gain through the
present difficulties and our
strength will be intensified a hundred-
fold.
It would be very interesting to meet
under what circumstances we meet
again.
Life is developing at such rate
that most anything may happen
and take place in the shortest
period.
I hope to have quite a few pictures
ready before long.
You know that it does not take
me very long once I get down to it -
About the noses.?! You did not
answer my question as to who
inspired you about my "Lazy" or
what ever the word may have been
noses!!
Well, well I dont believe any greedy

for it.
Maybe my roses will be sharper outlined for you this time, who knows I may even make a red or blue outline if that would please you" eh.?
If now I paint for about a year then I will come to some very interesting results there is no doubt about it. —

Well I close with all my love and best thoughts Yours

Please give my love to Amy & Inez.

I was very interested in the fact the Uncle is going to Moriah and is going to stay there with Louis / Nellie 4 or 5 of the time. I think this is quite a step forward. The old proverb says. "Festina Lente" Phoebus " that is / past the Cloud comes the Sun.

My Dearest,

I have your letter January 31. With Box of Fruit. page enclosed. It is alright in fact very nice so just go ahead of course one would like to have as many names in it as possible. That is quite natural. So just put in what you can. And what cannot be put in now can be added later. Having not heard from you anything that would refer to the Market of getting some stock I will add that the Month of March is fast approaching and I would rather you could get me some El Paso Light. Than Mullins as Mullins is not any too active Things I must say it acts the same as any and even faster when it does move but it may be a long time before it gathers Steam the same for Republic Stock very good but Less the Same Manner. With El Paso Light it at least follows the Manner. I. You see two persons I am but then I've got to be or else nothing will come to pass. As to your ticket for Buffalo I will send you on but it cannot be a very large one because of some new Regulations which are made up every so often.

Now about any future donation of Yours.
If such Times shall come!! You must suffer them
Love. That is to say you shall first ask our
advice and give nought without it. Will
you do it? And I was low say it is to
influence you personally. So that is why
I write you about it. By personally I
mean not through mails but through
direct conversation! You shall then write
us here direct or through me (If you trust me to
transmit it)!?! And I think it for the future
for Prof Roerich's trips. It is best it is all done
between You and here. as it concerns no one
but us. Of course you are given up so you
can mould your future in any way you see
fit and you may follow or disregard the pros
& cons advice also. The Music has been sent
on to you through the Himalayan Research.
Be sure to get it there are two samples
in it. Both are from Tibet and therefore
duty free. The large bottle according to
me is much better. But the Small one is the
same mark as the Best. Tongwin Music as they
are from the same place but different centers.

As to your saving pennies for Dan Lifs do it not rise of you. But You shall do well dearest if you heed my dearest predictions. Yes dearest just before dawn. And I can truly tell you that I really feel Resistant about coming back to the States. As a matter of fact I could not but then there is a lot to do.!! Therefore do I repeat to you about the Dance "Forget me not." (I would send you flowers were it not too early for them).

You ask me about the Woman apparently cured of cancer. Well, so it did happen but I still try to secure documents. Having studied Cancer for many years I have come to the conclusion that it is due to a disturbance in the Pitch Regulator Area. Excellent opportunity to give to our Physicians! — The year you have been used rather profitably &c as far as studies are concerned.

Yes quite a lot has been accomplished and more will be later. My Astrology has made considerable headway. Especially from a cosmic standpoint. But the field is so enormous that I feel quite sad at times at the prospects. ——

1905.

Now let us return to other points. What I am waiting for your private elucidation and you need not pass them on.

1) I have received a letter from Mrs Botta. ——— and just on this point I shall have to comment. However I (must) would not mind giving her a portion but certainly not the way it was done. There are two points in it which may not have shown you as very strange but which nevertheless are how they are.

1) First of all no one has the right to give a present belonging to another person without the persons consent but then it is the owner who gives not the „broker in between".

Now I quote to you the sentence of Mrs Botta letter: „the dear Friends of the Peabody Museum (Miss Lockmann, I was told, was the one who suggested it) presented me with an adorable little Tibetan Head" (sent by your hand, for which my husband and I wish to thank you ever so much." ——— Now. Look at the three incompatible statements and in what light I appear as well as Mrs Botta.

1) If the Skull belongs to me it is only I that can give it

8 87 91

but let it says about the Friends. implying it
2) was theirs. If so She cannot blame me for
I have nought to do with it.
3) Re portion of Mrs Botha who accepts a sweated
that does not belong to the Jews. and then
writes a letter fully convinced it belonged
to me. and you only administrated it. Shows
indeed a Miss Lichtmann doing and I did
plunge us into controversies. Because
certainly that is no way to do things. but
only shows the desire, pardon me for Miss
Lichtmann to play at a benefactor role.
But the first the uppermost wrong done
is that Mrs Lichtmann wrote Her that
She spoke to Mrs Botha about the sale
of a Sweated and now when the sale has
not come through She presents a Sweated
not belonging to her. That is very bad
as it shows But there is no need of paying
for one as one can get a present of one through
the good Graces of Miss Lichtmann Sir
As much as I would not mind giving one sweated
myself I certainly resent that strange
proceedings.

Another thing is the Sale of the picture
to R. M.? Stern (Stultz) that he bought it
to present you for Christmas. ——
Miss Loetmann writes: "Please don't
mention this to the others but I have sold
a sketch to Stern. And again "please don't
mention it to others this is strictly private."
And Lewis writes: "Nettie has sold
a sketch which will be presented to
R. M.ⁿ S. thence so much of Nettie and
listens to her advice."
Now that is plain enough. Why should Miss
Loetmann beg us not to mention to others
what she writes. "——
And that does come out. The desire to
play a part. The same as the chosen one's
idea. I happened to find out that Nettie
said to Francis that: She (Nettie and E.S.T. and others)
are most closer to the Teacher, through Karmic
reasons and that Francis has not got those
(Le anno a dio dignità)
inherent qualities. I also understand that
it worried constantly on Francis's mind.
This is a most dangerous Morally thing to
say. Because it is not so and if Miss

48 22

D

so it is unconsciously the greatest disruptive and undermining that can ever be done. ——
Just Like the Statement of Lord to Sina "that Nettie and Esther are the White Sisters and that the others must listen to them because of it."
Think about it deep Dearest and soon Love deeply pregnant with unconscious Law such a Statement is.
I love that Statement or words from Lord dear direct. Which shows he did not Know about it. The Law is an unconscious one but that borders on the Moral Side of Human Nature and which is as Lawful to himself as to others. ——
Do you see what I mean. Think about it. Any Entity that tries to rise above the other one at the expence of the other one only does so in his own immagination not in the final reckoning. And thus I say that Lord much Fr. and Sina were wrong much of it was due to the "unconscious" and partly conscious, but deluded attitude

of the others.
You may not care to hear about it but in some of your letters I notice a feigned criticism of the others and I hasten to let you know the other side of it.— And this is gathered from direct data.!! The depth of human Soul are so deep. One word said may do more harm than months of apparent ill feeling. ———
Another thing. this is for your private edification Miss Lechtman has written to Charles Lee of this Valley a letter saying that Dr. Botsford has spoken of him as Half breed. etc, etc. We were mortified when we read it. And Mother later master say, referring to letter, "madmen" (its equivalent). Don't you see that it causes us no end of future trouble because it stands to Lee that in our house we speak in these terms and that these terms are used as can be even heard. It's equivalent here is much worse than "Dirty Jew." Especially as all the Natives here. are half European and have Native wives. One cannot do such things!! —

You must know this to know the causes and effects. But do not mention this to the others as it would hardly do any good. ——
Ah for that Spiritual Light

My Dearest,

I have your short letter of Febr. 1. and I must say the Spirit wherein is evident has grieved me I will return later to the points you mention, in the meantime, let me tell you that the news when you write that the Appartment is quite neglected has not worried me half as much as Your own outlook upon it. Will you pardon me if I speak to you what I think, at least half of it and may be less. Well then you must know that I am quite aware of your thoughts, Your words & those that are brought to bare upon you from outside. You are most susceptible to influence Hence you must be ever on your guard and remember it for your own Spiritual good. The best of people often forget certain facts & are allowing themselves to be under certain misconceptions. The most important the most sacred duty anyone may have is his Spiritual development as thus he helps mankind the more. The greatness of human Spirit is not measured by appearances. As a mental development is not necessarely a Spiritual One. And You must

above all think about it. Who is to help you. There is no one but Yourself. Master will help when He can. but You must n...

It is only just I should point it out to you. And while I would never feel anything but friendship for you it is but right I should point it out. Neither mine nor Yours Raima would improve by my not letting you know facts. Of course one shd letty will not do it but it will come in time. As to your mentioning that I shall have to start without £75 of Mrs Botha's well, certainly that worries me not but how the Matter was handled by all is sad as it puts Mrs Botha in such a false position which will undoubtedly put her to the blush when she realises it which she will later. We here at least are at a loss to understand such proceedings. ——

1) Mrs Botha husband want to get a sweet. for her.
2) She does not want it but prefers an Icon.
3) She is given a sweet of mine inspite of her refusal to buy one.
4) She is given the Sweet by the trustees at Mrs Lottmann's suggestion, made to believe a natty told Mrs Sweet it's my gift but given by you to which effect I have from her an unanswerable letty. ——

you mention that my objects at Manhattan Storage were in dead Storage i.e. not in my room as they could not have been there after I gave the order to them. — How did they get there when they should have been in my dining room. — Another thing stands you think) my wearing my jewels etc. that it is too difficult for you to do the things I asked you to do just tell me frankly so and I will find some other way!! I don't want to burden you with all sorts of details.

I know you have your spiritual progress at heart and I will help you all I can there. Meanwhile I would like to tell you that I am not ignorant of your thoughts. —

And thus let me tell you for your good Keep your own council and remember You are very easily influenced which influence not being Yourself can never reflect rightly in Your Aura. I [не позднее 14 августа 1933]

I have your letter of July 19th and notice that you are not clear on several points. I shall therefore try to set you right.

1) I never meant you should open a special account for P. K. What I did mean was that you should try to help in the cause but I have not specified how. The means were left entirely to your discretion.

2) When I wrote to you that you shall have directly [illegible] to administrate the fund if any, ~~[illegible]~~ I meant that if there should be any money you would hear about it, or rather that to do with it. Directly is not thought me. And I did it with a definite object in view.

3) You probably thought I referred to the Fund I mentioned some time ago. But this Fund had not specified purpose and was to be used for General Emergencies in the Future. This fund had right to do with any trip and was available and not an indispensible necessity.

4) So far I only knew the following facts
I donated to you $150 (thirty Mrs. L.) You had to receive 30 from Both. As you wanted to get some Money that is all I knew of. And that was to constitute

By account as far as I know that you very kindly consider to look after.
But what you did with it or had it found I don't know save you kept silent on the point. ——
Plead as I am I can foresee certain events as I can see the general curves, rises, changes.
But fluctuations within a trend are so much intertwined with local developements that it is next to impossible for me to dictate to you. Also, I am here put in a position which precludes the possibility of being too explicit in cables or even letters. There are other reasons also of which I remain silent ——
Now let us turn to a major point.
I detected in your letter the following expressions "Bitter experience", "Broad confidence", "Sorry Business" etc.
You see I think there are doubts in your mind. I suggest that you should at once loose from my paintings all you think that is due to you in the past. I can assure that nothing would give me greater pleasure than to see your doubts allayed. Paintings like old wines only grow in value as years pass. And I am sure these paintings will

By trying our best we achieve more than ~~fail~~ when we are forced.

My Dear,

I have yr letter of July 19— And I notice that there are a few doubts in yr mind. I will try to set them right.

My Dearest —

I have your letter of July 13.
In it you speak in a rather veiled tone of some accounts funds etc. etc.
Now let me set you right. When a few months ago I wrote about a fund. I never specified how this was to be done. The necessity for such a fund (which would have no definite object but one i.e. to help in emergencies) is self evident from past experiences. — When later I wrote and said you should think of saving some money for Pat F. Trip I never meant that Pat F. would ever direct you in it. He certainly knows nothing of it and I know he would resent my suggestion. But placed as I am here what else can I do but to keep in all directions to further our cause. Having at my disposal a certain amount knowledge I can detect and foresee the major changes such as the change with President Roosevelt administration the rise in stock exchange of the Stock Market etc. etc.
But of course keeping free from here & out of

[20-21 mai 1912]

My Dear

I have received your letter of July 19. I do not think you were fully aware of the amount of work upon us & I could have probably have read about it.

There are several points in that letter which have perplexed me. You have evidently misunderstood what I meant when I spoke about the account for Prof Powell. I never could say that Prof Powell would tell you what to do with it. I meant Prof Powell will let you know what to do with the money if there were any. Not the arguments but of the account. But I could give you it in general lines. Looking ahead for major curves. Not hoodling — certainly here we need the future better. And moreover I don't quite get the idea of two accounts I spoke of raising some funds but I did not insist on the methods. — but when I mentioned I found that was something else again and I do not

1485 11 05

to do with the little money I could gain
the money from Prof. Powell + Bowles
for the photos was all I had then And
however little I invested would eventually
bring a good profit. As to your
statement Re Prof Powell account he
owes more that is very good news but
don't you obey the same rules. If not
well we always to be better.
However Let us join to your
influence to some [illegible]
money to feed

However there is a part in your letter
which you could kindly leave
written yourself and I know I need
you enough to mind that whatever
influence seen or unseen it is not
worthy of your better nature.
Cloud this as a reference to some
better experience with money, "giving blendly"
and that your confidence will be known if repeated.

And as to law They will use Mr Bonney & not for me to say but you can ask them directly.

But perusing again your letter
perusing aga

1. That Mr Ford was meant in general and regular in particular
2. Prof Powell knows nothing of that & not you he would resent if he knew of it.

189 ~~12~~ 21

I wish you did not write those words
at least I sincerely hope you did and
you think ~~them~~ ~~those~~ ~~them~~ before sending this to me.
~~This~~ was a true reflection of your mind
we could surely continue ~~to~~ correspond.
Our correspondence.
But since there must be doubts in your
mind a warning thought that you haven't
gotten all you were entitled to I have
I have quite a few pointers of mine ~~of~~ which you can choose all you want.
In a few years from now they will
go up in price and constitute a
real investment that cannot
take away as it may ~~all the~~ stocks.

want and as many as you think

Letter 3. Aug. 23 — 1933.

Well, Dearest,

Not having had from you the usual I conclude you are away vacationing (don't eat too many oysters at Baie-Harbour). Well, that may return to you all the needed calmness and you shall be well fitted hereafter to fight the battles of Life. Oh, yes, those battles that make the meanest of us at times show his teeth! But it is all a dream say some. Yes, answer others, but only inasmuch as we cannot face anything & accumulate with us (from here (of material possessions)). Experience is real and as such will follow us. ——

Our whole life is a preparation for the moment when we leave the mortal coil. Then indeed our whole Life will determine what we are to be. Here our thoughts are the sum total of our life. We cannot free them any more than we can free ourselves of that a certain caterpillar can produce only a certain butterfly. But we can ameliorate our Life by the right attitude towards the resulting Being. You must excuse this somewhat lengthy [illegible] but I enjoyed — Say, I must up to date matters regarding the Manuscript. Neil Gray has read

I am very busy working on my painting and I just want to tell you that I am in receipt of a Cable from the Indian Artist of 1933 Sen. In regard to the Portrait of Prof. Roerich which You acquired quite to my delight I quote verbatim.

"Allow me to congratulate you on the excellent portrait of your daughter Tatiya which I just saw in the month's Studio" along with a bunch of other portraits exhibited at the Roerich Museum recently It made my heart glad to see that the place of honour has justly been given to your superb rendering of Prof Roerich noble features altho it is a shame that it has not been reproduced in colours which crowning and hideous furniture have been given so much prominence.

Apart from the wonderful technical qualities of the work, there is not a single portrait in the present number to surpass it in colour strength dignity enchanged with vibrating energy personality combined with gravity which wisdom alone can impart for tranquil serenity & ease in the creative action. In the scene it is smelling like the [illegible] as Kalidasa puts it — Like the unwavering flame of a lamp when there is no wind as still. My Dear Ted

I love your letter of Aug 17th I see you all had Astrological days but you see every day there are bad days and they may be days of Love & reaction according to the conditions prevalent in the Planets at the time such as if the Planet is high and a reaction is due then that day be a seven drop if not that day be less taxing, dullness, a reminder in all. But in the Book of the Dead advance there always were six or seven bad days but the General trend of the Quarterly Influences was stronger than the daily influence. The Year being divided into four parts Now on Sept 22 the Autumn quarter begin the one of three months duration.

I am going to send you some faces I have some shaggy Collies but not good as a whole but very good for running, their tails are not very good and they are not old animals.

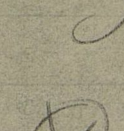
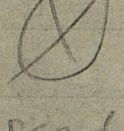
The days here are cool the Climate changes abruptly. The Sun is out for a short time it very pleasant. The Bay behind is Wet and Stormy all crept up in Clouds The Pines are again white already covered with Snow. I have not sent you any pictures or call Photo for my painting here as I have the necessary filters and either a filter the result are quite impossible. I have a Lady on a Blue background. The portrait can not Blend for a white background. Looks very dull and Sicky. I am trying to paint Portraits as well first they are very large as I Have an enormous amount of work to do they are needed and so I perceive. I send you a rough Sketch as I could not Bought always.





I will send you photo of the drawing of Prof Powell's portrait.

My Dearest,

In your letter you write about your Horoscope I haven't as yet fretted. For I was born with all sorts of things but personly I have grave doubts about your ring & Many thanks for Parcell Post I already received it but for $20 I think $12 is better. Many thanks As to your Horoscope I must tell you that as long as you are with us We will be good Good in all lines We must always remember But Wars are important But can help us or be Hearty all Earthly things favor much for yourself and therefore are important only as far as they help Remind us some days others Elyther Enrich us; by Devotion or Philantropy Not for some boys & the greater of us Such you say and I hope I shall see you in Person Meaning my poor Self. But I yet do not know when we must may & even may be not It depends on so many questions

But perhaps we meet soon

Please send me a photograph of the Portrait of Prof Perret which you bought.

I am writing all day long to business men. I did want to write you but this as many impediments and they must be overcome. I'm sure I'll get them in Sept. when the Banks are going to be settled again. But General Rules are good again? As if the heat affected them not. If it Sept. was considerable then the Bank of Colo. may require caution. But November, and Dec. be good again. For Dec. even ~~Oct~~ Oct. may not be so bad. But caution is always best. Now I write you that Hierony and Mother asks me to thank you for the silk gown I trust the Spirit will leave my Labor. It will probably enjoy it 1777!

My Dear Ted

Why I don't know I haven't been blessed by a letter nevertheless I persevere and send you a few lines hastily. I am right now in the midst of the Naval appropriation bill myself and if it isn't a bear I miss my guess. Oct. Not please investigate the following. Mr Cord the President of Auburn & Cord Co has gone into Shipbuilding and received Govt orders for 32,000 tons in the new Naval program. The Company is the New York Shipbuilding Corp was started by a lot of the Public and Morgan interests of Camden Auburn - Auburn engines the Stone & Webster Co. Shipbuilding is a comparatively - Cord is very short. I don't suppose any thing of this Cord or Cord is in the way of steam and the Pontiac divisions have taken properly. Here are my ideas and after Jan 1 sees a January I would rather go slow the directions are mixed and there are a lot of ready customers. Well we shall see — I am working hard as usual we must remember that the more we do better it pays ahead. —

My Dearest,

Our mountains are again covered with snow & look lovely but not welcome. But I think we shall have an early Winter here. The man I [illegible] the seeds has sent six for us to choose. Please see they don't go astray. It is small box and may be mislaid. They are not very good I admit. Some are just for cutting up into trimmings. But then the yellow ones are not easy to find nice large ones. I have very good ones left but they are dear. So please see the box does not go astray. I have not sent music for good reason. I have never heard of your assent to the cost so I differed. But as subscription valuable it is always in great demand. So no harm either way. Should you require let me know. But I've probably forgot to mention it when writing. I am working as usual. Time flies and is entirely too short to cover all ground. — I close with best love always and best thoughts to you.

My Dear,

I have received your letter with improved horoscope I have not yet had time to do it justice but glanced through. Well, I guess I may say your Chemistry up is not as one, look. Your life is rather complicated as it (at) would appear at first glance, except is not so in reality. Because of the many and inherent influences one must know yet thoroughly to really make a correct guess.

I am trying preparing my plankton the preliminary experiments have been encouraging. I am now trying to increase by scale. Let us see. If good I shall again enlarge it. It takes three years to rear one (the crop) but often the first year does not need so much care. Not many insect can afford it and a little some can they are not numerous enough to ruin the crops. So let us see. Not I am only in addition to my other achievement. ——
The world all see it in the future.

I have finished or practically finished a rather large portrait of Prof. Pocket. I spent quite a bit of time on it. My studies proceed as usual my only trouble is loss of time. Three years so little of it left.

You have never told me what happened to the Seeds I sent you. Did you plant them? — I do hope parcel will improve in Nov. Dec. You say you are anxious to hear the detailed aspects for next year I will send you them before the frost they are very interesting There are some influences that can be traced only with most difficulty. but I do not see any such wide trends as we had last Spring. The end of 34 has yielded some improvements, however I shall send you the information. —

My Dearest.

Your letter of Sept. 26 received. I know you say you are casting lots as an Astrologer with Mr Howels. Dare the rest will come and you must admit that a certain delay cannot change the course of a Science. There are many Local Things operating and you must always remember that the conditions of Planets are in proportion to our Local developements i.e if the conditions are of a romantic and the planetary directions favel. yet if very portate that a considerable improvement will come. If on the other hand the planetary conditions be good and the Local not very good then the planetary directions may show only a small influence.

Of Earl Count also you know — There was a small improvement in Sept but not enough to stand. Next however it was offset by other things. The November rise is likely and called so as also the December improvement Oct. was always under question. —

Well, do what you can and I will know better by Christmas & before I think it is wise to take advantage of the rise when it comes and take the profit. At any rate what you expect to spend on my pictures. I am sending you with the next mail a lot of pieces but they are only for your consideration and you must not disclose them even to our best friends or Agents. Selling low does not always pay and the fault is in the scale of the Journal to Boston where we have or the Exchange. But at the time I did not expect it would be time for my because of the price. And it is next it is just a waste.

Saying that only Three Rs stock were held at such a bank should be used. Instead without telling us know they get some at the current rate. Stock means a considerable loss because the Rs. dropped. Now there could be no mistake in the cable — And we should have been warned if something was wrong and the margin Money was not available. Instead we are notified post facto in letter that the rate was so and so. Stock means a 20% loss in all. I would give you sometime any amount of facts which will explain a great many occurences. But I am mentioning this only for your benefit and you must keep Silent. The question will be taken up through the proper question. —

My Dearest,

You must be having tough interesting times. October did prove to be a jerky month for with all the manual stumps and the jagged negotiations we've had over the Mt Roosevelt I've been the deadest tired very fearlessly. I hope he manages to keep the road. Experiments are exciting not always advisable. And the restricted telescope I give for next year should make him doubly careful. There is an ominous Saturday badly placed for the U.S. And while there may be quite an improvement in November & December. The first period is rather clouded. That is under many conflicts and cross currents. ——

Any how I am writing to you about my pictures as mentioned in my letter (last). I think that should get you to be able to get any big new one's should be very advisable for many reasons.

I have 4 colored pictures about (2½ x 2) pf. Some are very nice. The pictures are about #250. for Jan. a piece. But do not mention

Very nice portraits of the Lateral Lamas and other. I sell them at #700 a piece and even lower for several. They are of historic values because these Lamas are gradually disappearing. Photographs are hard to send because we haven't the necessary cameras and the results are quite astounding. Black face on white background. (or light face on blue or purple background). We have some fellow but they do not work well. I will try however. I have many 50 00 small one's. 12 inches or ten inches Sketches. They can go for #75- But they are really pictures not only Sketches. Decide for yourself Jeanette. I know it's not easy, but what else can I do. My Dear Aunt Ethel

I am not sure of any letter but I believe you are busy with the forthcoming events and October Moment necessary. Actually speaking October was always a questionable month from many points of view just as I have mentioned. Adverse past actions to the present. As I have mentioned before the influences are real and I really believe that present will have a definite wing attached. It can hardly be helped with all the influences about him, with all enmity let on earth can any upset. I realize very that we are heard.

Now great unrest is shown everywhere during February but I see underlying always financial influence but some Middle States are doing well even quite favorable. But Earthly ones are liable in California or Thereabouts. Dear Rose is Man faith, relative of the Pilgrim Act but some are Content as shown in it.

But Stays [illegible] a painful Pilgrim Act on [illegible] and Father [illegible] during March.

My Dearest,

Your letter of Oct. 31 received. You ask me advice about where to place the money. Well, there is no absolute safe place. At present Brit Canada is not bad. Yet business is not under good influence. And they are all, Canada S. Afr. a par or less linked to the pound. ——— France may abandon Gold. Swiss together is not Gold. And then one comes to the deduction that to hold every thing in one place is bad. It goes God every but not to have any thing to put into is bad. But it seems I left more difficult to find a suitable place for it. ——— Life is complex alright but I will let you worry later, not now as there is not enough time at present. ——— I am glad that the Conference went off alright. Every year a little part and it can be accomplished. ——— Dear, feel the little kiss that I just got from you as I cannot answer ——— any thing. I close with most loving and best thoughts

My Dearest,

I have your letter after the conversation and must say your statement that you have not sent it off because you would some "gossip" in it but pressed to recruit it is very pleasant news. Whatever it may have been "the gossip" We probably knew it anyhow and the least said the better. There is nothing like idle gossip to disrupt and undermine the best endeavours. We must look into the future. This Life is nothing but a state And we must gladly prepare for our next Existence. I am working on the Book of Tzong-Kapa. The Lham-Rim. It contains most precious indications. Especially where it Says that the surest way to progress is to follow Spiritual Men. "A man who stays with men equal to Himself, will not progress, A man who associates with Men Lower than himself will degenerate and only he who follows Men Higher than Himself can progress."

I have Gone Over Prof. Horoscope and find that most Astrologers Draw a mistake

in the Date Line. Hide Father
has on the 27th of Sept. Roman Calendar
struck out for the Gregorian 10th of Oct.
The first Century would have the 3rd
October. Every century adds one extra
day. Thus during this difference of
one year in forty and Twelve
decreasing in the planets amount
by 24 hours which is quite enough
Thus according to my estimation the very
good years for Father Time have
fade but not fully and very soon
as Spring is here. Such
we may conclude that the planets
in ultimate effects. For the sun not only

for a New World Peace Council.

Clay. Sup. 1 Spica Virginis. or rather the Position is indicative of a New Peace Organisation or Endeavour with Great Power ——

Take find in the Raphaels Almanac where it says about the formation of a World Peace Council and it shews its great Power and Vicinity.

I quote verbatim:- "The Position of Jupiter with the fixed star, Spica Virginis, will cause a remarkable religious revival and a very powerful world-wide Gathering together under ecclesiastic auspices of very Eminent People to form a National League for World Peace which Possesses world Power."

The Knight came to me and it shall be developed by Prof. Powell in the Next Minutes of forming a Council in connection with our Banner of Peace and Part. Such Council will be all inclusive and as long as the Stars are Beneficial can be formed ahead this year. It gives further possibility for Practicality in connection with the Peace Part without appearing onesidy.

December 13 -5

It also gives it an all Embracing Aspect and gives us Power. But after the Arrival of Next Minutes or even go ahead and get busy on it. Not to Late time. And with such excellent Start as the Washington Caucus in every change into the other and Continue Unbalanced such as the developments. — Read of it to our Brothers. It has Call to include into the minutes but it will be developed next time.

I wish to give the Sentence about the Arrival of a Great Orator in U.S.A, India.

Turning back to 1924 as was written in Raphael Almanac That a great Artist will appear and events of Art will be very prominent in the Fall.

Opening of N.Y. Museum - Fathers arrived. As truly stated in the Dalai Lama Letter Nature has lined all parts of her Empire with subtle Magnetic threads and thus into a relation even between a Star and Man.

It's Extremely Cold here everything is frozen. We are on usual praying & Fasting and Prayer Department. If prayer is not the Key and the Strength in the Great Pattern of Evolution, it must stand. Our best and this we shall succeed in the End.

There are certain rules in the Prayer of Man or woman for acceptance. Once mastered and always remembered it becomes easier to Prayer. I have copies these rules over over and over again with Good directions they are inexorable

My Dearest,

I had no letter from you today needless to say I cannot but could be glad to hear your impressions of the Convention. I see by the papers that Lola and J. M are only waiting a favorable opportunity to start home. I also see that Jewel departed on the 23 of November for the Chestnuts. I am glad he reached Clarksville safely. Lola has come after it ought to. My dear we are going on as usual. If I haven't sent anything for the Christmas it is only because I will send something with Faith. Bob and his new mining shares are very obstreperous types.

I am going to send you photographs of a very fine young Lama who is really of the old type of Arcadian Shepherd. We have our Lama now and had some very remarkable visions. It was pleasant to see the real type of Shepherd again. My shed next but one for the Lamas

I have an excellent plantation but it cannot be completely developed because I can't afford it.

But about my pictures. Will you get some? I do not wish to force anything on anyone and especially on yourself. But I have to think of all ways and means. And this was just a happy thought. Moreover translated in one of your letters. Of course do as you think best. If I send some pictures I shall send you the list so that you better watch after them. I wish to have you attend to it. And not someone else. Many reasons prompt it.

As to when we meet again it is hard to say but let us hope it will not be in the remote future. Yes, events do develope rapidly and time flies by.

My Dearest,

Your letter written when on "Lattimans Left" Received, accordingly I shall not expect any letter with her. Except the personal (delivery) letters are always more apt to contain interesting information. The reasons why I am staying here are many first of all to Stay with Mother and help as much as it lies in my powers and Secondly well of this we need not speak. As to when we are likely to meet, well that is not for me to say. Events are taking on different stages and our meeting depends upon these developements. I only regret I cannot tell you some things that may perchance be of great use to yourself. The reason: I would have to write a Volume and then it would not dissipell some clouds of misconceptions that have formed. They would have to be taken up one by one. And yet they would not be vital unless they are explained from every angle. Life is complex. So complex at times that it takes days of analyses before one accurately unravels the tangled threads.

By Dearest,

I have your letter of Dec. 22. Don't feel discouraged Dearest. Those thoughts of Yours make Your magnetism weaker. It is unfortunate but I cannot let you know all I know and while it may have been of great use to you it contains too many strange facts and volumes (as You mentioned) to elucidate facts. We would have to go back years back to find causes and sheer back and through. It is a tedious job and its only usefulness would lie in the fact that it would throw light on many incidents. Life is so complex. It cannot be reasoned only by this life there may be causes generated long ago and when they are exausted (often they not) they prove farcey and very complex influences. We live in a hard School the Hardest there is, since for us Mortals there is no other chance Yes, conditions have changed and when we meet they will change even more.

The fact that I cannot convey to you facts as they are but must leave you under the

wrong impression often shows that condemn have
Lorged and when they well come back to their
old status Heaven knows.
Miss Lichtmann arrives here tomorrow thus
A new Cycle begins in the U.S. but how shall
I explain Unless I say wants you with all
facts it is hard to grasp my meaning.
The Lham-Ryn says a man who comes into
this life with many past births but does not
consciously exercise them is like the fool
who gathers refuse into a precious cup,
for Quiet will be his Karma. To know
better one must associate with those that
know more. But we must guard from
choosing as guru those who say or think
they know more. That often happens as you
may well know; And is but too often
Shown of in all Sacred books.
Inasmuch as I would care to tell you
more which would help you I cannot
until certain Heavy Magnetism that
lies between us is lifted. That
Magnetism is responsible for many unseen
influences and happenings. ———

Life is so complex and nothing would give me greater pleasure than imparting to you some things I know. but .....

You must not feel that all of the next year will be so bad, there may be bright spots in it but Low on Earth can I from here give you all the facts. Then facts change according to developments. Every ~~letter~~ case needs its treatment and that can only be correctly seen as it is. If the Stars indicate an injury to your foot and you prepare for a spasm and then instead you hear it there must be material on hand to treat the new circumstance. So also with the Planets it must be discipline on spots as I have often so often.

No calculation is worth much unless we watch the events and put two and two together. Life is so complex there are a million influences at work.

Many thanks for all the Bay. you send. About the leather coat, unless it is too fancy and effeminate in which case I regret you did not send me a Golf Shirt to go with it. Many thanks just the same

My Dearest,

Many thanks to you for the things you sent me except for the Leather Jacket. The rest can all be used. The Jacket being of a Ladies Model is not quite best fitting and besides I am somewhat broader (I loved shoulders). But all this does not matter as I can have some anyhow. And I made a mistake in asking for all these things altogether. I cannot name this a long letter because I have too many things to do with Father departure. Such as Jenny's long walks still part of this for us here. ——— With all this you cannot blame me for shortness in this letter. All this confidential. I cannot send you a letter though Father will because it will or may be troublesome for him but In this letter I only wanted advise you to be careful in what you say to others. to avoid unnecessary criticism. There were long discussion about You having Stock accounts in Fathers Name, and Steins name. With recomendation that it will involve the names etc etc. ———

Altogether just typing my request never to speak of it. and because of this leaving out please close them when convenient to avoid for me the unpleasant task of typing reflections upon your activity. It is unfortunate I cannot tell you more, but you remember what I wrote to you repeatedly about keeping your own counsel. I had good reasons to do so and I repeat all this even more strongly now. Friends must be analysed for their motives what prompted their original friendship what were their thoughts. You may not know but I know. I have all facts before me and only hope some day you shall know everything. I fully realize that to know all facts is a great help and it is my sincere desire to let you know more. But whatever it is. It can only be when we meet in person. And then this will be no one knows as yet.

Ky Dearest,

Shan't be as long a letter as I would perhaps want to be but I have so much work to do to-day & there is hardly any spare time left before mail must be forded on.

You must remember Dearest that the only possible screen can come from work together since the personal considerations are the determining factors. If one works in the closest harmony all will come well otherwise nothing may be expected. Two heads or beings in common purpose & so much stronger sound than the two when struck separately. Under these conditions are night screen pictures & appearances some of the regular field generals the necessary distractions. ——— Everyone on the C.S. has a certain difficult & wearisome task to perform & we shall be done. Jenny has a neighbours field and leaving one's own undone is not the right procedure,

I am writing this now because funds are approaching when you should have to start decisions happen. I am sure you have that keeping in mind what I have said you have the right decisions.

But you must remember that March 12. Mars an important anniversary and certainly nothing must happen to disturb the forces.

You know well when I feel that I can fully depend on you I cannot plan my programme in full effort with you and have no success impossible.

Therefore Dearest - look ahead of yourself and you should have right decisions.

Events to the future as I can see it is so clearly. My intuition now never fails me it is for the reason that I have selected Astrology by intuition so more correct I feel.

I close with much love & all best wishes & Regards Yours. SAR

My Deerest,

Yours letter of Jan. 12 received and while it is marked 33, i.e a year late I will treat it as a recent one.

Well the Manuel is strong. You cannot complain and while on Jan 12 it was yet one point ahead of You may be by now you caught the rythm.

I have finished yet another portrait of father and I must say it is even better than the other one's. But it remains here. My next painting is the portrait of a Lama Considered the incarnation of Milarepa I understand what you write about the publications and I have spoken of it You will have the results later, but please send us a complete financial report it would help. " How much money outstanding from whom, where, when etc etc.

I see where Min Palmer died from Cancer - I am working hard to find something, I know of several cures here with local drugs. Now I am working on a local Medicine.

My Dearest,

I am sending this over with Prof Reeves
And while I cannot tell you all I could otherwise
I will try to elucidate a bit.
The cycle turns and New Events have shape
There is a change of Cycles in My County and
Soon will begin its upward Movement
when she will be liberated from the Rule of Saturn.
It is going to take time till everything becomes
organised again but the oldest Prophecies all
point to this great Event. Now let us turn
to Yourself. I want to tell you one more
that I look you down only too well. The
Spiritual Achievements are the only ones
that Count and that is how from Lightcomes
and must make their object of our Strivings.
That Light will remain for ever with us & how
all the rest will perish. And is it not Maya
to try to build up an Evanescent Pleasant
Life after we do not the Keys & then we
are Lonely to loose all. But there is the
Great Maya. We must Judge the true
Value of Things by that Standard remains
after all has passed on. ———

Striving towards true Beauty Elevates the Soul because Beauty is harmony.
Surrounding ourselves with Beautiful things & Time reading the Scriptures & even Holy Words are recorded. You have been given much You must make use of all You have seen and heard
If you are now to Live in N. Y or the Conditions as a whole you are placed it only means it is the best field for you to work in. Which will be best for you as well as for your associates. There is a good reason for everything.
But what is greater than the Spiritual Attainments. The Joy & Rest it gives cannot be obliterated
All your problems you may have write us and Mother will let you know. It is only Love that you can find unalloyed friendship & Rest for your Spiritual Good (as Ever) Even Love I cannot let you know the facts which someday may be yours.
But there are great days ahead (a X 45, who follows the Path of the Spirit.

How rare are the friends who realy put the Spiritual Elevelopement of a person above everything else. But it is only they who can See above today for beyond that can be Called Our friends. In your activities You Have 310 Rs for advice in your actions and relations You Have Gnelia (that more can you wish, provided You follow it.

You letting this to You because I know it to be So. You will do well in following it as it will give you all and more than You can wish for.

You have a Good friend in Jaye to keep you company Some

In all You have more than many, many other people I know.

Your future Day be very Bright as it is in Your hands to Rould it so.

My Dearest, 34.

I have your letter of Jan. 27. 34 ——
I will answer it in all main points.
1) about the Publication of Books. But
You shall hear about it directly. And then
everything is ready you will know. But
your desire to see them published quickest
is very good and praiseworthy.
The directions for the Heart cover you shall have
when everything is ready.

2) about your trip to California. Hardly
you and Conner will be there, he usually
travels east (also by the by be careful
in case you want write about his reputation.)
otherwise he is a useful person. And then
You must be careful of Earthquakes.
California lies in the Zone. ——
Of course they may strike Thuringia Europe
or the East but never stop in brick
buildings or on a top floor in a Skyscraper
as the Elevator may become disconnected
and brick buildings as proved very weak.

We had ten quite an earthquake you
know of course on Tully only felt a shock
there are many short shocks throughout the
year but a large area suffered as large
as England and Scotland together
the relatively small number of deaths
computed roughly around 12-15000 is due
to its taking place in the day time when
many many people were in the streets.
But damage to property is enormous.
Only the very old as well as the Concrete
buildings stood. Some wooden one's
also remained. Interesting that when the
shock came the local astrologers were
in a temple praying for the shock to be
averted as they predicted it long ago.-

3). The Seeds have to be planted in the
same soil as good for Carrots (Not
clay) They like moisture moderate
sun exposure but then you are in a
Northern Country and the sun is not
strong so you can expose them to it
for but taking Nan is not advisable.

84
100 ~~88~~

4) About costumes for Udai Shankar
well there are plenty good designers
in the U.S. or Paris, why he can have
the best crop of them anywhere!!

5) and
now coming to the request just put just in
your letter to let you know about the
various things I cannot tell you or why
could not. Tell you
Well, that depends upon yourself
You may learn more gradually but
I repeat again You will hear about
it not when You Attain You will hear about
it.

And now I close

with much love

Always: [illegible]

I am glad you found the moon & will prefer to express this in good rude anglo saxon.

You write about our characters sort of "Do it Bill" indeed! as being a correct one. well you must "have all astrologers are good men and is it all good men are astrologers."

And now let us get to something more important and as it is a little information you will not, I hope refuse.

I would greatly appreciate if you could gather all my letters written to you and burn them in a good fire.
I will do same with yours here and even will summon my witnesses of the deed if you insist.
Remember in the past I have not refused you as regards letters etc.
This will be much better
and while I have no reminder before I do it rest hoping you will not hesitate

to do it
Upon receipt of your letter to this effect I shall send the fine in my laboratory and place there every day for consumption or rather incineration.
It would be much better all around.
As to news here they are the same.
Everyone is well, I enjoy it early —
I have a baby-bear but he is a model child and is no trouble at all. He is about 12 days here and eats and adds weight abundantly. His present weight is about 2 pounds, so there is plenty of room ahead. — I had him weighed again he now is 2 pounds 4 oz
My work is coming along well and I have several new interesting problems ready like always the pondering
Yes, there is plenty of work ahead always!

[1937]

My Dearest,

Your letter of Feb. 14 arrived. Many thanks for the "Lama Picture" news. A real "Knock Out" Yes, no one knows of it and if you prefer no one will know. But it is better if I say the picture went to you. Then there will be no question about it. Thus I will say that picture went to you as it was sent to R. M. and they will have it. Many thanks for particulars were indicated to any one — Put it under glass, please, because N. Y. dust is bad for it. ———

As to other paintings the View of Lakeland are very important but I do not want to suggest any thing now only in case you wants to get something in the future. This scene is important in the entire range. But of this later. ———

My Suggestion in my last letter, and the Burning of letters is only based on the fact that since you go away perhaps to Europe or elsewhere it would be unwise to leave them unprotected in view of the Enemies that swarm everywhere.

If yer prefer yer could seal them and ask Sams to put package in his Vault. Yer can make a package all sealed and tell him it is some past letters and he would please them safely. Or any other suggestions if yer have. We must be especially careful now, why yer shall know later. —

Well, about the suggestions to invest the money! It is hard to judge this year as I said before because conditions are very much mixed up so that almost anything can happen but in April sometimes there is a chance of a great drop and subsequent rise. We better put behind the Stock side. but if the drop be very important and yet nothing devastating happens. then one can risk cautiously to get something, little at first — The indications are that there will be a drop followed by great activity and boom in Speculation The exact moment is hard to say it may happen as the result of sun opposition to ♃ (Jupiter) on the 8th or 9th 1918-19- when the sun is conjoined with Mars & Uranus - opposite Jupiter

(J)

Patience one must be careful and patiently wait for developements. May seems better somewhat the more reason to wait for the drop in April but one must be cautious and watch one sees one's way it is better to wait. I prefer not to risk. As I repeat these months are very mixed and can bring about most anything. As you rest on the Silver question as again affects me. I have written to you about it before. Better to wait always, until one feels sure of one's movements let us not see what April has in store for everyone. ——

The good news about the Proceedings of the House are very gratifying. ——

We are all well here working as usual The Bear is growing Scents his Lair. He is very friendly but promises to be very strong. ——

Will write more tomorrow. ——

As tomorrow there is a lot of other work to do I can finish it today. The Study of Life is the great Study I bet everyone my usual. There is no greater Study. ——

And yet while surrounded by it everyday and being part of it we do not know it. People always love life as an end in itself not as means to the end, only. By Life, I mean everyday Life on Earth. How easy and difficult it is to progress. Everything lies within man. He can accomplish everything, the Path is founded on it, and yet how difficult it is to keep one's self about everyday troubles. They are the best and only teachers we have and instead of loving them this way, we make ourselves miserable because we are personal in everything. Persistent and Striving constantly carried out everywhere will perform miracles in a short time. Man makes two steps ahead and immediately retards all ground gained — Yes Dearest constant Striving and being censor of our Spirit will lead us over all obstacles.

I close with much

Love and kisses to always

My Dearest,

We just received the news that Dr Simon of Riga passed away the first great loss in our work which magnitude cannot be felt as yet.

It might be viewed us again that Life hangs on a thread and any of us may go at any time. We must apply all our efforts to accomplish as much as possible. He did all he could and one can truely say that there never was even a moments hesitation on his part to do the best he could. And despite as his Life was yet there was never a sense of even the slightest disappointment to his teachers. And thus he stands out as one of the first Great Leaders of the Movement to go. Ever as his post he is an example for all his coworkers.

Yes, Dearest one is too apt to forget the realities of Life, and one must strive and accomplish all one can while it is yet possible!

Turning to Life - we hope next mail from you will be absent Father's arrival. If I forgot to mention an absent addressment:

Dec 6 10

I want to say Neither then: it is better to wait until "Heart" comes out and Eastern Sun-Rods can be included but I think you ought to make of it a report for the minute it is long since we head from the A.V.P. by way of official "document."

I hope you follow my advice and will do nothing in Manner until Spirit lead if any! And then may be on a small scale Things are unsettled throughout the world. And my Astrological forecasts I send You certainly look mixed up & yet I blame us them. If there could be Peace Pact you could get some outright may be but You are a better judge than I & difficult to look ahead so far and especially without direct contacts. —

I close with all best Wishes — and Love —

Always — S.R. —

My Dearest,

I have your letter of March 16th and am so glad you have seen Father.
By the time this reaches you Father may be leaving already but let us not look too far ahead.
Sweetheart even a few weeks seems full of changes.
You must ask Father all questions you may have because it is a chance which must not be lost.
Then the next opportunity will present itself as it always does.
I am working here on usual painting and adding material to my Pastoral work. Some day it will be quite a useful Study!
Yes, we must look ahead always. The past is only a memory to help build up the future.
There is no use Dwelling on anything in the past except as it is a step forward. And Looking into the Bright of constantly improving Ourselves. We shall achieve the greatest Results. This Living Thought will lift us out of the greatest difficulties and Guide us and Our future.
I close with much love and all best
Wishes always. L R

My Dearest,

Your letter was absent but I believe it was swallowed up by the letters addressed to Mrs Lichtmann, Pl. Stobingstr.

Father is leaving Yer shortly I hope you have cleared all questions you wanted to ask—because opportunity lost is time wasted and when it comes up again everything may have changed.

Not so low life runs after all. One must keep up in one self the Eternal fire burning once it cools off one must start all over again. An old axiome but too often repeated by Alchemists whose writings were so often misunderstood!

One must Separate the Volatile from the Fixed "by" the application of Heat and stirring stick in the fire.

I want to add - All are well and we continue our Work.

My Dearest,

I received your letter of March 17-20. Where you write about your first meetings with Ray Porter. Yes, I hope you cleared all questions you desired. Cleared sense Father will not be long with you, I may not return soon and letters are unsatisfactory! Such is Life, you know and we must take advantage. — The Music was fine Monday night. Ray sax. —

I am glad you lined the pictures, Put the Lining under Glass-clean. Dust is not good for colours - I find - And then Glass keeps the Sun Rays out. —

We are living in the same quiet way — My Work or Reading Continues and I have a great deal of Material gathered. — May be some of it - will be useful - I am even sure of it as a matter of fact. —

Painting also progresses well, We are only slow of time, if anything!

The path of Spirit is such a narrow Lord Jesus Path - pitfalls right + left.

Your letter of April 3d received and I thank you for the thoughts expressed therein. The same picture was ours as I did write about and I have written as to Prof Rowan therefore it was not for you to pay for the glass.

I am working on many experiments with plants to be acclimated useful plants or a lower altitude.

I think we are very successful in a way. Is there any other small picture you would like to have I am looking for them for sending out expeditions for plants. However it may not interest you. I believe we have very important medical material here.

But I must tell you that above every thing we must think of the Spiritual Evolution and advancement. It is to be done in every thing we meet every day. That is to say in all our thoughts and actions and the development necessary will prove far greater a reality. I feel that you very well do as they

I dare do no such thing if you prefer so.
I have no objection if you prefer so.

My Dearest,

I am sending to you herewith the promised Seeds for Amy & Yourself. Try to plant some in pots, but they are Spring flowers rather so I do not know if they will come up now in season. They love the Sun. Give some to Amy.

My planting of Ruth is giving unexpected results instead of flowering at the end of the third year mine are flowering at the beginning of the second year and have grown so big that they look like many year old. Thus they will give their own seeds acclimatised properly. Maybe I shall have a new early ripening variety. It is true they got an excellent looking after, but every new venture requires special care at first.

Thus we must try in every way. And often many things are going at the same time-some of them are found to succeed.

But I can assure you and cannot but repeat it too often Weight it may seem tiresome But at the End the Spiritual development alone stands. That alone counts. And as truly said there is hope for Man-but no

And it lies in Everyone's power to achieve the highest if but one applies to it. Look around Yourself — Nature follows the course of Evolution in perfect fitly but without interruption and when there be an accident we see the greatest changes manifest in the shortest periods. We must remember this and by constantly to grow Spiritually and never feel discouraged but persevere. Every day goes by periods of Activity followed by periods of Rest. But when it seems as that we Spiritually are at a standstill we must persevere in the same way and shortly we shall reach the Period of Upliftment and our growth will be the more manifest. Then we must constantly try —

I am hoping this letter will reach you before you decide to go on a vacation or any case please let me know (as I hope you will anyway) where to write you in order you may be travelling. I suppose the Museum is the best place.

In your last letter I see where you want to know about old books. I wanted to tell you as the best I with some exceptions of course I have here. I sent you a list long ago (some two years ago) but you never responded to it in any way so I kept silent it now occurs to me that the names are so disorganized that the fellow one may get for them would not help much anyway and an opportunity of doing better in the future will be lost. However you may ask sometime what are the prices for Medieval Manuscripts of importance.

There's a friend who wants to get some cosmetic switches and heads of hair but prefers to keep silent. Well I think everyone does as he thinks fit but so I

shall not inquire and remain discreet regardless - It is fact that one always prefers to know where one's work goes.
And therefore I say the things may go from 50 to 75 in your currency. but then in your own discretion and I shall not interfere.
It was a great joy to hear many good things of You from Prof. Poensgen. He mentioned the fact several times.

I suppose the branch is named for April comes now that the regulations have been passed.
But after a while people will get used to the new conditions such is Life!!

My work is going on usual - let me know your plans if any -

My Dearest,

I have your letter of last week & know you write about getting a farm. Well I have formed it up with Abbe and he as well as I myself does not think it advisable. It is not so much the cost of it if you can get it very cheap but the upkeep which always amounts to a big item. There comes a day when every thing changes from day to day it is better not to own any extra property.

Every property is a burden I can assure you & I'd like to remain free from any other ties. Things will not remain the same they will change and then you may decide.

However this is only a suggestion and you may do as you like after all.

But really it is better for you not to have any extra property just

In Los Gatos I sent, I mentioned prices for certain of certain not merely friend's to do not buy but if you think were you can reduce them

You are not [illegible]

And I want to pay for it.
I have a tobacco medicine (including the
use of snuff) which stops sneezing and

You did not write me about your plans for the Summer as you said. The one I like you wanted to go to the farm. I speak again the farm is not a good idea and you will see that yourself soon enough, as to general development they are numerous and you will be soon see them, make Ben appearance. And now I can repeat only, Love patience The events are taking steps.

I am working on my fields of medicinal herbs, painting and gathering medical information also studying the scenes of Nature. Than I write and do a lot of small things in handicrafts drawing etc etc. also looking after the Estate as much as you, I like but it all can be done and even more. I type I do so-night now I am gathering material of the Para nirvana. I have interesting facts from some Buddhist works. The Cosmological conceptions are not to be analyzed in their Ultimate transformations and one must remember this

but we can connect some ideas that resulted from a littleral interpretation of existence experiencing what seem fashioned for a certain mentality ordinarily tied to be limited to a few Spheres! Infinity! Everything implied in the word! we cannot attach any thing finite to Infinity thus we cannot ever analyse the Ultimate but we can expand conceptions along the ladder of Infinity.

By Document,

Well, it Summer in here and it is warm, we need hope for the Monsoon to come soon. The rains have quit altogether here! After all the in Gods a heaven on and high up the Sun is always hot. Mr Mrs Bell and child are feeling the heat in the afternoons. It nearly gets warm. My medical plantations of Rutt are growing well. I am planning it would be a splendid business to start some at Mercal planting Rutt. The Market is in china and Pastmen (the greatest producer) even today makes of it an income of #25000 yearly. Here is practically no expence and the area of Pastmans production is not more than 50 or 75 acres. It is easy because I have now seeds from my own growing here and every year there will be more & more. The seeds are not obtainable on the outside because Pastmen post to the extirpation of any part of the Rutt plant. One needs plant 20-25 acres to produce #1000 worth of Root and 75 to more at yearly.

One started the plants go on on their own accord as they have very powerful root. This is a splendid job. by the by My own plantation commands a very large sale because of its steep hills and it will no doubt be the pattern of the Valley. Steep hills are difficult to cope with as well as bad roads improvements of sorts etc. etc.

The cultivation is the same as beets (sugar beet) where a tractor could be used as large plowing as Kutch loves deep soil and is grown as farmers here grow potatoes. I find the roots grow larger. It is interesting to note that my grass Kutch is of a better quality than it's wild one. - Well, we shall see! but I believe it has a great future ahead.

I read yours with pleasure ~~letters~~ to the wrote. Your office - very nicely kept & looks good. One must always try to do one's best and then many things comes easier.

June 20 34

My Dearest,

This letter may be somewhat long as some I am not so liable to be interrupted. For the last two days I developed a very peculiar light fever but it lasted only 35 hours and now I am all well again. Thanks to my extensive mosk treatment I can overcome most complaints in a short time and feel none the worse for the indisposition.

I see from your last letter that you are greatly in favour of a farm. And my letter must have seemed unpleasant to you I guide against it; but I could not help it you kenow, since you were asking my advice and I had to tell you what I knew of it, however I repeat that should Uncle want it very much it naturally lies with him. As I have already told you every thing properly there days is rather cumbersome, and while it may not seem so at first it is so sure to appear so later. I will send you some seeds of Sunflower also other flowers. Did you expose the seeds to Sun and I hope you did not plant them deep. They are all types

and need stimulation. I will send some brand new seeds shortly though for them. Old seeds can be received sometimes but it is too long to go into all the methods.

Our Menagerie has gain what with a bearded Vulture and Tiny Owl. The Vulture was hurt but has now recovered and there are hopes of letting him out shortly. The Owl looks like a little mushroom, is quiet tame and lives on a verenda. She cannot fly very well but as soon as she can she will go back to the woods. ———

The Bearded Vulture has a very spread of over nine feet. My plantations are growing well and there is a great future I see in the field of forestry and scientifically developed.

In my last letter I did not mention that in the Mus. Committee report we read about the "Hostesses" but between us how can the persons mentioned ever explain paintings by prof Ravi Verma. ——— It is a good idea but the Gayeka must be up to the occasion." is lost.

Well, as I have long ago written you the Laroscope news sound very promising! — Everything looked damp, more heavy than rises. —

Are you having yours now? You must not be afraid of it I have tried and observed it's action upon others and must say it is most gratifying and gives wonderful results if taken in large enough quantities and at the right time. People are always afraid of it since they (the doctors) used to give it as the "last resort before death. I am sure the patients would survive much better if it were administered not "before death" but at the onset of the disease.

Good quality is essential and commercial products are never good they decompose and deteriorate before they reach the consumer. I have sent you good Meat from the Animals and quite fresh too. As I have already mentioned Meat is best when taken slowly with a small cup of black coffee. They were very well fed by Betty. I have two Hens

now three times a day as much as twice the size of a one cent coin (penny). Half of a coffee spoon with black coffee and thanks to this elixir my recovery was extremely rapid and normal. The temperature dropping down to normal and going down no further. Send Jun circulating around the house today I spend for the medicine. ———

Slowly I am agreeing now and more knowledge and the life of the Cosmos becomes more and more real and a more basic obstacle based upon so many wounds, circles and white lets. as it always seems at the beginning. Bad then our intellect always tries to project a soul-less life-less system upon the Screen of our vision. Life can be seen but still better felt through the heart one must sense it by our synthetic perception. Otherwise it will be no better than the description of a life-less body devoid of feeling and organic life. It will be walking but a life-less shell. It is real. And but many teachings have become a mere shell only because the followers could not contact the life enclosed therein it was a bone then and they could not sense it. ———

~~128~~ 128

It is for this reason that we see people spearing the highest formulas and yet their essential thinking below that of an average good man. It is because they reflect their words like a screen door a parrot but they never have risen to make them their lives. They have not transmuted their energies to the next perceptions of life that go with their high formulas. Hence their Spirit cannot digest any benefit therefrom.
Life is so infinitely complex as to confound the wisest men. Solomon indeed grasped the real significance of Infinity. And yet how essential it is to listen only to speculations are attempted!!

Well, I close will much love to you and best Thoughts always.

In your last letter you write me that you have bought the farm. If so let me congratulate you! I hope you will love it and it will prove a good investment.

What will you grow over the rest of the place as ground-potatoes?

Don't worry about Ruth's seeds. I will send you more when mine are ripe. Perhaps you could plant an acre as so of Ruth late. It is a very good harvester and acre is not so much but then one can store small.

I hope you are feeling well and the heat does not affect you too much.

We are having rains now. Mother is feeling better since it is much cooler.

My Dearest,

Your letter in which you say about the arrival of my letter discouraging you to go to the farm (Summer house) to be peaceful has arrived.

You must not feel discouraged, for the simple reason that the matter is of little consequence. After all it does not matter one way or another, but since you think it is good you go it may be as well you do so. Anyhow I am glad I have written to you my opinion. For the simple reason you asked me about it first. You have not waited for the answer for which I could give you a friendly scolding. But as I say it does not matter any how.

We are very happy here over the splendid reception Mr. Forrest received in Japan and further. We have all the clippings and they are really excellent. A great step forward!

Thus everywhere there are movements and accomplishments. Good times are ahead!!! The fact that Hugo wants

to get a plumbing so find she could have one for $30-40. She can borrow Leon's but then is put at the lines. Your idea about the help for workers also read but the manner is peculiar to say the least. Let us hope it improves!!

We are wondering how as usual as the days are not too short.

The days are pleasant now the monsoon has abated for awhile. Will send you seeds as they come out the little dwarf Rhododendron the so called Baby and the Poinciana (a Peltophorum tree.) also other flowers.

And now let me send you my best wishes for your new Country place and let us hope it will be a very good acquisition!

All best thoughts and

love always.

My Dearest,

Received your letter of June 23. with photograph of yourself and Spencer. Many thanks.

Now I shall proceed directly with questions asked.

1) The farm is not important enough an issue to worry over thus you may just as well keep it.
And dont worry over it any more.

2) As regards the appartment at N.Y. sell it by all means.
I have already long ago written to you to this effect.
The sooner you dispose of it the better as to what you will want to have an appartment well, that is for you to decide on the spot as circumstances may tell it to you.

3) Where to keep the money! Well, certainly not in Newfoundland as the conditions there are tinned with gold they may leave at any time.
Rent 8 cents a Canadian Dollar I believe it is invested & the pound.

~~146~~ ~~134~~
144

For Ever the Rupee. Live (per 4 cents) and Australia or South Africa. Then condition while not perfect is better than o[ther] countries. Then why not buy Canadian Dollars or better, Split it between U. S. Canada or some such place as Sweden but Canada seems nearer and more convenient. But anyway one must be even in the about these days. Conditions are such that it is difficult to predict anything but in general lines. However you have Louis to help out in case of an emergency by advice as he is going to be in the business. You can always open Item in general lines. However I send you Item Seeds Cents Plant where You can to best, they are from our best plants so don't lose them. Peas have come up in a pot in about 13 days.

Plant two in a pot and turn upside down half shade dig ground well and plant them so more than ½ inch inside ground. Those in the open will come up later may be by 10 days.

~~146~~ ~~138~~
145

This is the early ripening variety and is of our own make. In raising cultivation. It is crossed with the best early variety of similar plants and is already a pure product. This progeniture attains leaves over 3 feet long the second year. Don't lose them now!

Well, Dearest Theo Life runs. I hope you have read every thing clear in your head I repeat again I am always more than glad to answer your questions when I can as to how you want to live after the affair. Said that you must see yourself what is best.

My Dearest,

I have not had the pleasure of opening your letter this week Thursday or did come last week.
Well, I suppose you have many things to do.
If you can you ought to read sometimes the book by Evans-Wentz. "Tibets Great Yogi Milarepa"
(Oxford University Press).
It is a most useful book and I recommend it to you. It gives an insight into the old type of ascetics.
Every thing goes on as usual here everyone wonders how at the end of the month no particulars news so far. ———
I hope you shall follow our advice in discussing the appointment. It is a wise move from many points of view.
What are your plans in general?
Thanks for the snapshot of Spencer I have no interesting photos to send you so I send you the Bear

What with all the orders to see to fulfill the schedule is well known up.

It is raining hard here just what the monsoon ought to be like.

Somewhat cooler, but stuffy as yet. How is your cold? Do you like the Barley water?

Hear about the Music?

I notice there the moment is going up and down - up and down but then the season is such now.

I close with much love

My Dearest,

I have your letter of July 31st
Upon your return from Conn
Ph. & all I want to tell you that
we all feel very touched at the
donation you have made for the
Emp Centa. Its work is most
important and this helps it
greatly!
Another thing I feel I forgot to
write to you about & talk for some
time & on my mind is that
You ought to be very careful
& a man by the name of Purves.
He arranged lectures at the
Museum. His reputation is very
bad and you must not deal
with him in any way - should ever
opportunity present itself.
Also the Proposition of "Masters"
for the pictures is not to be
encouraged by you as it tends
to lower the Standard of a
Museum to have Lectures. Like
the Patron - takes a fair exhibit
the Landwers & crowded Salon!

Your idea for the Electric washer is good but there are always things that look good but are too expensive. For instance there are the sewing machines & vacuum cleaners that require Electricity but they cost some $250 and we don't want any more things just now - they cost too much. That would be! —

Of course now it is too late as the Rent will stop it a month or so.

This is all the work of Karma and nothing can be done about it very well. The only thing everything changes and we shall come to better days sometime! Nothing is permanent in this life and therefore we must only hope for something that will be beautiful in the course of evolution.

Life passes so quickly Before we know it we have reached the End. In the turmoil of Life one is too apt to forget this but it is so never Mind.

Mother wants me to thank you for sending her the powder. I hope you have debited my account accordingly.

Likewise I thank you for attending to the photograph of the portrait.

As to a new portrait of myself that is much more difficult since that is something I cannot procure now. It is rather warm just now even in spite of August but soon things will change.

As I said before I would not pay any money in Europe owing to the favorable Canada figure alright and so near enough. I doubt very much Your country will have war with anyone the only one is with itself.

Your letter must have stayed with you. —
as none made an appearance here.
The time flies so fast one has hardly enough
time to turn around and think.
All are well here and I hope everyone
is well within your "circle". How are your
ailments?!
My Dance is coming along nicely. The
Flamenco's are quite good too and
are being enlarged some as much as
possible.
And how is the New County Place?
Since you decided the Ward Farm.
I hope you shall succeed in disposing
your apartment. I see no reason to keep
it longer it is high time!!
The Big trouble in Europe is certainly
long lead pencils don't seem to improve any.
Only hope it is full of future pencils
and it will not last much longer
without some changes. —

My Dearest,

While there is not much news yet I want to keep up my weekly messages! My question of the books & change etc. has been taken up separately and you will receive it amply answered under separate cover, it is weird of you to have asked the questions.

We are working hard on all the various multiform problems that arise daily. Plenty of rain and rather cooler now. How is the rain problem in Connecticut? I have done considerable painting and must say the series is rather interesting when they will reach the completed World they, is difficult to say. But then again life is full of surprises and Fate has many an unexpected turn hidden away. ——

I dare say not that should rather discourage you from writing.

Can you please take from my account #50 fifty dollars and give them to Lewis as cost of cultivating some land. for K.

I am going to experiment with it next on a small scale first as there is risk of the seeds not growing up well. But it is always worth while to risk and "no risk no gain" is very true.

And why does the new Book cost more by £12.0.0 also were the extra expenses? —

And how is your "Farm" or Estate? How is Spheres "vegetable Market" I hope it does not begin to fold on / on you trying to get better prices!!!

We are all well here — and it is getting cooler the Snow has fallen on the Hills already. I have gathered many Alpine plants of interest and am trying to grow them here but I do not know

My Dearest,

Have you letter when you tell my boys will probably get the "Egyptian Juggler" only I could well remember it however it probably was done at Darjeeling. boy at the with other scenes. It flagstaff appeared and is very nice the type being larger and better than before.

Mother was pleased with it.

While business was bad it may improve let us hope so.

Yes, the Summer is almost over by now. I shall send you seeds as I have a large variety many rare plants growing at 14-18000 feet they need a small greenery. and need shade as the hot sun would probably kill them. Height your Latitude may be compensating for height.

I am painting a series of paintings and probably will send them to the U.S. later.

December

I am glad to hear of the perfect week on the A.X.I.
Tis a good beginning that will expand and grow.
I am getting many flower seeds for experiment will send you some.
What of St Fabian Gardiner you have in to in charge of the place. So as to be instructed accordingly.
There are some rare plants I have they grow very Leggl but may grow below also. Most of them do - I believe. ———.
Events are developing. ——
Our life here is as usual — The monsoon is over I believe but it has not cooled very much there may be a difference of four degrees. However there is a spell of warm days every year at this time.
Although while everyone is well the Summer is not on of perfect ease as there was an excess of rain here of November and (to many the days & nights cool) and an excess of moisture

I have done quite a few pictures and will send a couple to U. S. The fall when it gets colder.
How is Ijanen's Vegetable garden going on!
Gardening is an interesting work and very instructive too.
You ought to have planted all the seeds I sent as I can always send more!
My researches on the alpine flora is about complete and I have found new varieties of which I try to get seeds now & then I succeed or not.
I enclose a photograph of the Unreal plant called Saussurea Sacra. The wool is white or magenta-flowers dark blue or red purple. I have found one with lyrapple-green wool and white flowers a most beautiful variety and am trying to produce the seeds.

Well, I close with all best wishes and bright years always

My Dearest,

Sam writes when you write that the seed germinated received. What to do with seed well, can it be transplanted into a nice place with Earth, & not disturbing roots.

That would be alright I believe. The main thing do not disturb roots save Earth as it was in pot. if Earth disturbed too much roots will not grow and may rot or onset of frost. Cover with leaves when frost begins. We on experiment and does not matter whether seed lives or not. Rather seedling plants shady place. The plant when full grown has large leaves 36" (inches) long. The stem thick comes when flowering to about 5-6 feet high.

Will send more for spring planting as soon as snow clears. Seeds will be sent. Should grow well. Will have some free & send grass may temple. A picture will be sent you when procured. In few years you can have nice little tree. And if I am alive by then may even see it sometimes.

My Dearest,

Not having any letter from you this week I have no excuse to answer and since our life is going on as usual there is little news from the Front. However, since the Grand Peace parade is to be signed in April we must use every effort in upholding the idea of a "Grand Peace Port" in other words it must see that the name given to it at the time of signing. Speak to Frances about it. There being a tendency in certain dark quarters to smother the Name and leave it a Port. Therefore all effort must be concentrated to this Effect. Tell Frances I wrote you this as today that all efforts should be brought to bear upon this point.

I am sending you just a bit late Xmas present which is under way. Have sent some to the W.S! What of the Schilling Festival and what are the things coming from Lucy?

I will send this fall a few of my paintings. Not many but a dozen or so to be kept separated as the climate here is not very good for them.

Also can you please (if such they still exist) transfer from my account $400 to Mrs Ponvert account here through L. Hirsch. But that will go to Lee account. There is a lot of expenses to cover here. But do so convenient I leave this to you. Louis H. knows Mothers account at Lafont.

I have your letter where you tell us about the reports received from Texas regarding the Friends of El. Y. P. Well, I believe the underlying reason was obvious enough — only a desire to know if any thing was done to this here since the news admiral we get fed reports from A.Y.P.

I know well that it is not easy for you to make up data when there is little of it on hand but still the various suggestions that come up during the debates are of your Centers object to be regarded.

Such suggestions as these coming from Foreman or other sources are of interest since I admit I have little if any fault to find with or tedo.

And you know, Karma works in her own way and if properly analysed the past so as to what cannot be mind. Whether to trace back events - years back and analyse them carefully.

And if we see the picture clearly enough we shall perceive - there are impediments in the way. However, maybe Karma can always be changed in its ways - not destroyed of course. That would be impossible but just like an event that is caused by the moment can generate Karma & last years or more so Karma generated over a period of years can detain itself in the brief space of a moment.

This statement you shall not find often in the Buddhist Scriptures as one place where Lord Buddha approaches the subject and states in a veiled way it says the same thing. Analyse it carefully thoroughly and you shall see that it points to so as reciprocation can always take good. Yes, Life is full of mysteries and is the hope of the Absolute.

I was able to write you Everything for December 4th. & you may well remember it is 10 years - an anniversary full of significance since it is the End of a cycle. 10 years is a long time. 10 years is a long time to look retrospectively back back and viewing our mistakes remember not to make them again. My Dear [illegible]

Yours of the 2nd & 3rd Inst. are before me. I shall be glad to see you here as soon as you can. But I cannot advise you to leave Virginia before the Assembly rises. Your presence is necessary on your Estate. I am sorry to find that the payments under the Compromise will be made until all the old ones have been settled. I can see the only way to help you. But of course Mr. Ellis is not to pay you until he can pay all. He says the Assembly will rise then all parties. And [illegible] I shall write to you under Cover to Mr. Ellis's Proceedings and if you do not hear from me you may be sure that I have not received them. You must pay the Interest if you can. But I do not advise you to [illegible] your property as long as you can i.e. when it will not pass the Law to do so. Write to me by Mr. Ellis's Packet. [illegible] You are foolish not letting me know

Tell you commitment as I could always help you same way. And if you are faithful enough I you will see that for yourself. There is an old saying "Homo Hominus Lupus." And it means "Man is Wolf to Man," It applies everywhere!... Love alone can't make dark future. Many times you will not be able to visualize but some day you shall see for yourself. My Dear Ted,

You will reach you just before Xmas or at any rate before N.Y. Please accept my best wishes and thoughts which often go out to you whether they are felt by you or not I have received a nice letter from Izzy thank her from me please I shall write to her next week. Sure I have a lot of things to say & of course there's Mother and Les Chatterton well the most urgent.

I was going to send some sweets but I have changed my mind for the present on account of any thing but the fact that I am not sending any paintings to N.Y. as I planned to.

The reason you will guess yourself. As I have written to you before on the subject.

Now again you'll please listen to what I am writing to you! Since

(2)

I mean it. Do not make contributions at N.Y. but should you feel inclined do so towards the End Since we must cover our Expenses I mean the word of Honour (some of whom cannot be cashed for certain reason) and what by all covered by Betty and what I can myself Since N.Y. cannot do anything for us except owe a great deal.

Thus you must realise that even at N.Y. there are many to attend to Matters which I see we cannot do anything and you shall entirely do what Matters by helping here. Its is my earnest Endeavour to get. As you would Save Betty worry and then do a doubly good deal.

I shall give you in my next Letter the exact address of Matters account here so that you can act accordingly!

But as I can only that here are

(J)

why you stated contributions simply
I would be far better if you would
have my readings for A. A. Series
You could say something daring at the
end I would feel much better.
Great Events are ahead. But as
regards War it seems to be
only in '36 and Even then
towards the close of the year
So at any rate Astrologers agree

I close, but I repeat it seems
the heavens endorse us
the U. S. may improve some

My Dearest,

First of all before I say anything else could you please get and send me the book called, 'Nature's Finer Forces' by Rama Prasad at Allahabad bookshop. or the best you can readily send to us. Mother would like to see it.

I regret you have to advance the money for Z class, Paris, Sir — you ought to have the club Committee decide matters and you could not guide from here. You cannot do it. I do not know your president Mr Hart is someone else has an eye on the matter.

Just start finances, since everyone is known, you must and must be ready to help. Otherwise you will be left alone and should you fail to provide everyone will pounce upon you for non-compliance.

That is an old fault, I do not want need be repeated but it is useful mentally

I am sorry for Mother Smith for Christmas but yours and I am Engaged in preparing for my large Contract of Mortar and to be followed by one still larger Soon my Weights were off a large Scales.

I was so glad to hear Manly Kelly Spent on the twelve Hymns of his Zodiac and other Hundred Lectures. I always had a very sincere appreciation of Lee Rawlegh and was glad you very happy to see him as Human There is no one better than him in the line. I hope you need him and tell him what I wants read to you. Work hard, decent — Sound Sense appreciating fact. With Patience and diligence, Every day — learn to learn. Try to improve yourself. Sure Poor Baba, who polished his little brass kettle well just as well as, as I ken he discovered on Right Topics

The Buddhist writings credit Lord Buddha as saying that "Patience was one of the greatest virtues, dear to Nirvana."

The Masters say "He is greatest who is greatest in the Science of Patience."

Confucius says: "I will carry each day a handful of Earth to fill a pit and build a Hill with time, in course of time."

Yes, as Master K H says.

"If the thoughtful man on the way to Attainment, fall they step and saved by Succeed for better days, what cheer for patient doer."

I am quoting this all from memory so there may be an omission or so but the Essence is the same.

I close with all best thoughts, wishes for 1935 always Love
