Дорогой Содружник,

Большое Вам спасибо за Вашу книгу, она доставила мне истинное удовольствие. Всегда жалеем, когда приходиться читать, что либо в переводе, особенно же повзию перевод которой почти всегда должен терять, но Вы были очень счастливы найти такого прекрасного переводчика.

Поэзия должна быть истинным украшением нашей жизни. В ней таится созвучание наших сокровеннейших мечтаний и порывов. Где проза бессильна поэзия легко вызывает живые, вибрирующие образы и ничто так не передает звучание мимо-летних переживаний.

Вн избрали прекрасный Путь, от души поздравляю Вас и еще раз большое Вам спасибо.

Dear Sir,

In continuation of our conversation, the other day, about an article for the Art section of Bharat Jyoti, I am enclosing herewith an article of mine on the Significance of the work of Art which may be used by you for your paper.

As regards reproductions, I do not know what type of things which you would like to have. If you have time do come to see me at the Taj so that I could discuss the matter with you personally.

With all best wishes,

Your	S	•

I was very happy to have your letter of May 14th. I am glad that most of the difficulties have been now overcome and we know how the matter stands. I must say that the Institution in question is most peculiar and how they carry on their business I really fail to see. I understand it is a common complaint with other people too. That inefficiency may not be quite accidental and there may be some special reasons for it, such as, delays permit longer operational time. When I come to Bangalore I shall try to see if there is any key which fits into the description given to me and I will let you know. Any how, for yourinformation, the key is named AIWIN and should be 1584 or so. Check with the key you have at home. It is true that there is new paper now but one can still return the old. However, I feel it will be timely to take proper measures as there have been many indications of new conditions to come.

Yes, you are right, that you may bring the Tankas when you come to India yourself. As regards the boxes, let them be where they are at the present moment, as, first of all, I cannot send an exact list of their contents except that the things are very old.

The Government is producing a Film on Father's life and George is very busy. I am trying to secure shots of Kulu and Father which a friend of ours has taken and which will be incorporated into this Film. The Film will show scenes of the country-side of Father's estate near Leningrade. Then will show a cross section of all the places where he studied, of the places which he visited and the various museums with his paintings. The Film is to be completed in the record time of two months which, to my mind, is quite inadequate for such an important document. However, I am trying to rush from here all the material we can gather. As usual, there are innumerable delays for that or the other reasons.

Don't be surprised that you did not get the musk because I did not want to send it to America when you were leaving the place and before I send it from here I wanted to make sure that this particular address is the proper one for me to send it to. I would like to add that is becoming more and more difficult to get the product and I would not be surprised that in another few years the supply will become negligible. However, it is quite safe here waiting despatch.

The plans for Kulu are just the same. A lot of repairs had to be undertaken this year and they are being carried out quite suffessfully, I believe, but there will be some radical changes which will have to be done to the buildings when these buildings are to be used for a center. That will be of course a major operation but I must say that more than ever I believe in the potentialities of the Kulu Valley. Some of our friends

14

of ours who went to Kulu this year with us were also tremendously impressed by the valley and all it has to offer. In many ways the valley presents the most ideal setting for any kind of creative activities. As usual, my difficulty is in obtaining the right type of good workers who could be entrusted with the work that we plan to do.
