

THE HERBARIUM,

ROYAL BOTANIC GARDENS,

KEW, SURREY.

All communications should be addressed to

THE DIRECTOR,

quoting the following number:—

8th September, 1937.

Dear Sir,

I must apologise for having been so long in replying to your letter dated 1st July, but I have been away during August and have been very busy since my return.

The Primula forwarded is Primula Reidii Duthie.

We have not many specimens in our collection and it is probably a rare species and very restricted in its geographical range. I may add that we know little about your Institution and should be interested if you would let us have some data. We are always glad to see dried specimens of interesting plants and should you come across anything of interest we should be happy to name it for you.

Yours faithfully,

Keeper of Herbarium & Library.
