

APPRECIATION BY SVETOSLAV ROERICH ON
SHRI KRISHNAPPA'S TEXTILES

Shri Krishnappa is working in a new technique of Textile Dyeing under the name of "Marble Print". He achieves very striking and rich colour patterns flowing over the entire surface of the textile, very reminiscent of the effects obtained by Mogul Artists on rice paper. This method provides a very promising field for further elaboration. Mr. Krishnappa's original effort must certainly be encouraged and his project to start a sort of Gurukulla where artisans shall live and work on these textiles is a very commendable idea. I sincerely hope that he will find the means and goodwill needed for the furtherance of this project and I wish him every success in this very worthy endeavour.

10th April 1968.
