So I select, defend

and stop the race of armaments
while it is to get not too late.

Beautiful is the concept of
Peace, ^{Beaconing to a world of fulfillment} Reassuring, ^{Life-giving} and re-vitalising

Capable of regeneration to
very concepts of ^{Life of} the ^{trailing}
Millions.

Let us ^{pause and} think what will all

Fear,

Distrust, greed and ^{hatred} hatred

and deploy them is a more

Today- perhaps more than ever before, let us dedicate ourselves to the sublime concept of Peace.

Let us gather all our thoughts and project the power of this creative energy into surrounding space to influence the unfortunate millions of mankind threatened by a man-made holocaust to raise their voices in protest and stop the senseless and cruel race of armaments while it is yet not too late.

Beautiful is the concept of Peace Beaming to us from a world of fulfilment, Reassuring, Lifegiving capable of regenerating and revitalising the very concept of the life of the toiling millions.

Let us pause and think what will all this mad race of armaments lead us to ? What can it achieve and what is its cause ?

Fear, Distrust, Greed and Hatred are at the root of this mad stampede to secure ever greater and more lethal means of destruction and deploy them in a more resourceful and destructive way.

" Fear cannot overcome fear, hatred cannot conquer hatred " . What Beautiful and supremely practical precepts were left to us by our predecessors. All we must do is to remember them and gather them painstakingly , to cherish them and apply them in our life.

Let us gratefully remember these great men and women who often sacrificed their very lives to kindle the flames of understanding and good will on this planet and today, especially today, remember their great advice and try to apply their lofty thoughts and concepts to our most complex fast developing yet often impoverished way of thinking.

It is our duty to pave the way of the future and sweep away the cobwebs and dross of our modern life which in its ^{complexity} complicity and superficiality often blots out the real meaning and purpose of Existence.

Let us all unite together and think of every nation as a ~~code~~ ^{brother} of our Brothers, with whom, hand in hand, we can build a most beautiful and radiant Future.

From my first acquaintance with the Art of Pushpa Dravid I was much impressed by her treatment of the subject matter and the organisation of the component parts of her compositions. Her Art is both Decorative and Expressive and she handles and arranges the surface of her paintings in a very competent way. Her sence of colour is both original and pleasing and her paintings stand out wherever they happen to be shown.

She had a thorough training as an Artist and was connected with many important art organisations as an instructor in painting for a number of years.

She travelled extencively and visited the leading Art Galleries and Museums both in India and abroad.

I am certain she will give us many more Beautiful Paintings in the years to come and I wish her every success in her Rich and Dedicated Life.
