Calcutta.

Dear Sir,

This coming December our Institute will publish the third issue of its Journal, previous copies of which had been sent to you regularly. This issue will be dedicated to the scientific explorations of Inner Asia by the great Swedish Explorer Dr. Sven Hedin and we venture to express the hope that you will contribute to the success of this issue by sending us an article of your pen on any scientific subject you may desire.

Thanking you in anticipation

Yours sincerely,

Director.

P.S. Please let us know the number of offprints you will desire of your article.
