The Secretary
The INDIAN INSTITUTE of SCIENCE
Bangalore. (Mysore State).

Dear Sir,

In conformity with this Institute's practice to dedicate the issues of our URUSVATI Journal to great scholars, who have distinguished themselves in the scientific field, the Board of Trustees of Urusvati Himalayan Research Institute of Roerich Museum intends to dedicate an issue of the Institute's Journal to Prof. Sir C.V.Raman of your Institute.

You will recall that previous issues, which have been sent to Sir C.V.Raman as well as in exchange with your "Current Science", - had been dedicated to Prof.Charles Lanman, Sanscritologist; Prof. Albert A.Michelson, physicist and Dr.Sven Hedin, explorer, respectively. We request you to kindly obtain Sir C.V.Raman's consent for the dedication of an issue of our Journal to his name, as well as to send us an autographed photograph of him together with an article by his pen, giving an account of his most recent researches. We further request you to kindly give us all available biographical material which would enable us to write our usual dedicatory article.

We have followed with profound interest Sir C.V.Raman's great attainments in the field of science and shall deem it a privilege to dedicate an issue to him.

Thanking you in anticipation of your early reply, for favour of which a stamped envelope is herewith enclosed,

Yours sincerely,

P.S. We are sending under separate cover some printed matter for your Institute's Library.
