"Current Science"
Bangalore.

Dear Mr. S a s t r i ,

With reference to your previous request for articles, you will no doubt be interested to learn that this year marks fifty years of Prof.de Roerich's archaeological research and activities and at the same time it is the 40th anniversary of Prof.de Roerich Fellowship in the Archaeological Society of Russia. In this connection we are sending you enclosed an article "Nicholas Roerich and Science" by Mr.M.M.Lichtmann (unpublished in India), which you are at liberty to print or quote or review in your esteemed journal. We are further adding Prof.de Roerich's articles "Combating Ignorance", "Sogns of Mongolia" and "Erdeni Mori" as well as an article by the undersigned, describing the remarkable Pact for protection of scientific and artistic treasures of the world by means of a Banner of Peace, similarly to the Red Cross. The Pact has already been signed by all the American Republics and it will not doubt interest your readers to learn of this safeguarding of treasures of human genius.

When anything will be published by you in this connection, we would appreciate to receive some reprints of this matter as well
